QID : 401 - How many two digit prime numbers are there between 10 to 100 which remains prime numbers when the order of their digits is reversed?

10 से 100 के बीच दो अंकों की ऐसी कितनी अभाज्य संख्या हैं जिनके अंकों के क्रम को पलटने पर भी वो एक अभाज्य संख्या ही रहेंगी?

Options:

- 1) 8
- 2) 9
- 3) 10
- 4) 12

Correct Answer: 9**Candidate Answer:** [NOT ANSWERED]

QID : 402 - How many perfect cubes are there between 1 and 100000 which are divisible by 7?

1 से 100000 के बीच कितने पूर्ण घन हैं जो 7 से विभाजित हैं?

Options:

- 1) 5
- 2) 6
- 3) 7
- 4) 15

Correct Answer: 6**Candidate Answer:** [NOT ANSWERED]

QID : 403 - If A = 0.142857142857..... and B = 0.16666 , then what is the value of (A + B)/AB?

यदि A = 0.142857142857..... तथा B = 0.16666 है, तो (A + B)/AB का मान क्या है?

Options:

- 1) 10
- 2) 11
- 3) 12
- 4) 13

Correct Answer: 13**Candidate Answer:** [NOT ANSWERED]

QID : 404 - If A = 0.abcabc, then by what number A should be multiplied so as to get an integral value?

यदि A = 0.abcabc है, तो A को किस संख्या से गुणा किया जाए ताकि एक पूर्णांक मान प्राप्त हो?

Options:

- 1) 2997
- 2) 1000
- 3) 1998
- 4) Both 2997 and 1998
2997 तथा 1998 दोनों

Correct Answer: Both 2997 and 1998

2997 तथा 1998 दोनों

Candidate Answer: [NOT ANSWERED]

QID : 405 -

What is the sum of

$$1\frac{1}{2} + 4\frac{1}{6} + 7\frac{1}{12} + 10\frac{1}{20} \dots \text{upto 20 terms?}$$

$$1\frac{1}{2} + 4\frac{1}{6} + 7\frac{1}{12} + 10\frac{1}{20} \dots \text{ के 20 पदों तक}$$

का योग क्या है?

Options:

- 1) 12410/21
- 2) 12412/21
- 3) 12433/21
- 4) 1179/2

Correct Answer: 12410/21**Candidate Answer:** 12410/21

QID : 413 - If $y^2 = y + 7$, then what is the value of y^3 ?

यदि $y^2 = y + 7$ है, तो y^3 का मान क्या है?

Options:

- 1) $8y + 7$
- 2) $y + 14$
- 3) $y + 2$
- 4) $4y + 7$

Correct Answer: $8y + 7$

Candidate Answer: $8y + 7$

QID : 414 - If $f(x) = (x - 2)(x^2 + Px + 4)$ and $(x - 3)$ is a factor of $f(x)$, then what is the value of P ?

यदि $f(x) = (x - 2)(x^2 + Px + 4)$ तथा $(x - 3)$ $f(x)$ का गुणनखण्ड है, तो P का मान क्या है?

Options:

- 1) 4
- 2) -4
- 3) $-13/3$
- 4) $13/3$

Correct Answer: $-13/3$

Candidate Answer: [NOT ANSWERED]

QID : 415 - If $[x - (1/x)] = 2$, then what is the value of $[x^6 - (1/x^6)]$?

यदि $[x - (1/x)] = 2$ है, तो $[x^6 - (1/x^6)]$ का मान क्या है?

Options:

- 1) $114\sqrt{3} + 1$
- 2) $134\sqrt{2}$
- 3) $142\sqrt{2} + 3$
- 4) $140\sqrt{2}$

Correct Answer: $140\sqrt{2}$

Candidate Answer: [NOT ANSWERED]

QID : 416 - x, y and z all are positive number. If $3^x > 9^y$ and $2^y > 4^z$, then which of the following is TRUE?

x, y तथा z सभी धनात्मक संख्या है। यदि $3^x > 9^y$ तथा $2^y > 4^z$ है, तो निम्नलिखित में से कौन सत्य है?

Options:

- 1) $x > y > z$
- 2) $x > z > y$
- 3) $z > y > x$
- 4) $y > x > z$

Correct Answer: $x > y > z$

Candidate Answer: $x > y > z$

QID : 417 - If $x = (1/8)$, which of the following has the largest values?

यदि $x = (1/8)$ है, तो निम्नलिखित में से किसका मान सबसे बड़ा है?

Options:

- 1) $x/2$
- 2) x^2
- 3) \sqrt{x}
- 4) $1/x$

Correct Answer: $1/x$

Candidate Answer: $1/x$

QID : 418 -

$$\text{If } X = \frac{1}{1 + \frac{1}{1+X}} \text{ and } y = \frac{2}{2 + \frac{1}{1+y}}, \text{ then}$$

which of the following can be the value of $X + Y$?

$$\text{यदि } X = \frac{1}{1 + \frac{1}{1+X}} \text{ तथा } y = \frac{2}{2 + \frac{1}{1+y}} \text{ है,}$$

तो निम्नलिखित में से कौन सा $X + Y$ का

मान हो सकता है?

**Options:**

- 1) $(-\sqrt{5} - \sqrt{17} + 3)/4$
- 2) $(2\sqrt{5} + \sqrt{17} - 3)/4$
- 3) $(-\sqrt{5} + \sqrt{17} + 1)/4$
- 4) $(\sqrt{5} + \sqrt{17} - 1)/4$

Correct Answer: $(2\sqrt{5} + \sqrt{17} - 3)/4$ **Candidate Answer:** [NOT ANSWERED]

QID : 419 - If $P = 2^{29} \times 3^{21} \times 5^8$, $Q = 2^{27} \times 3^{21} \times 5^8$, $R = 2^{26} \times 3^{22} \times 5^8$ and $S = 2^{25} \times 3^{22} \times 5^9$, then which of the following is TRUE?

यदि $P = 2^{29} \times 3^{21} \times 5^8$, $Q = 2^{27} \times 3^{21} \times 5^8$, $R = 2^{26} \times 3^{22} \times 5^8$ तथा $S = 2^{25} \times 3^{22} \times 5^9$ हैं, तो निम्नलिखित में से कौन सत्य है?

Options:

- 1) $P > S > R > Q$
- 2) $S > P > R > Q$
- 3) $P > R > S > Q$
- 4) $S > P > Q > R$

Correct Answer: $P > S > R > Q$ **Candidate Answer:** [NOT ANSWERED]

QID : 420 - If $A = 125$ and $B = 8$, then what is the value of $(A + B)^3 - (A - B)^3 - 6B(A^2 - B^2)$?

यदि $A = 125$ तथा $B = 8$ हैं, तो $(A + B)^3 - (A - B)^3 - 6B(A^2 - B^2)$ का मान क्या है?

Options:

- 1) 4096
- 2) 4608
- 3) 4224
- 4) 3456

Correct Answer: 4096**Candidate Answer:** [NOT ANSWERED]

QID : 421 -

If $x^{y^z} = 1$, $y^{z^x} = 125$ and $z^{x^y} = 243$ (x , y and z are natural numbers), then what is the value of $9x + 10y - 18z$?

यदि $x^{y^z} = 1$, $y^{z^x} = 125$ तथा $z^{x^y} = 243$ हैं (x , y तथा z प्राकृतिक संख्याएँ हैं), तो $9x + 10y - 18z$ का मान क्या है?

**Options:**

- 1) 18
- 2) 15
- 3) 12
- 4) 5

Correct Answer: 5**Candidate Answer:** [NOT ANSWERED]

QID : 422 -

If $3x + 6y + 9z = \frac{20}{3}$, $6x + 9y + 3z = \frac{17}{3}$

and $18x + 27y - z = \frac{113}{9}$, then what is the value of $75x + 113y$?

यदि $3x + 6y + 9z = \frac{20}{3}$, $6x + 9y + 3z =$

$\frac{17}{3}$ तथा $18x + 27y - z = \frac{113}{9}$ है, तो $75x$

+ $113y$ का मान क्या है?

Options:

- 1) $163/3$
- 2) $143/6$
- 3) $218/9$
- 4) $311/3$

Correct Answer: $163/3$ **Candidate Answer:** [NOT ANSWERED]

QID : 423 - If sides of a triangle are 12 cm, 15 cm and 21 cm, then what is the inradius (in cm) of the triangle?

यदि एक त्रिभुज की भुजाएँ 12 से.मी., 15 से.मी. तथा 21 से.मी. हैं, तो त्रिभुज की अंतः विज्या (से.मी. में) क्या है?

Options:

- 1) $(5\sqrt{3})/2$
- 2) $4\sqrt{3}$
- 3) $(3\sqrt{6})/2$
- 4) $3\sqrt{3}$

Correct Answer: $(3\sqrt{6})/2$

Candidate Answer: $(3\sqrt{6})/2$

QID : 424 - In a triangle ABC, AB = 12, BC = 18 and AC = 15. The medians AX and BY intersect sides BC and AC at X and Y respectively. If AX and BX intersect each other at O, then what is the value of OX?

एक त्रिभुज ABC में, AB = 12, BC = 18 तथा AC = 15 है। माध्य रेखा AX तथा BY, भुजा BC तथा AC को क्रमशः X तथा Y पर प्रतिच्छेद करती हैं। यदि AX तथा BY, O पर प्रतिच्छेदन करते हैं, तो OX का मान क्या है?

Options:

- 1) $4\sqrt{3}$
- 2) $\sqrt{23}$
- 3) $2\sqrt{23}$
- 4) $(\sqrt{23})/(\sqrt{2})$

Correct Answer: $(\sqrt{23})/(\sqrt{2})$

Candidate Answer: [NOT ANSWERED]

QID : 425 - In a triangle PQR, PX bisects QR. PX is the angle bisector of angle P. If PQ = 12 cm and QX = 3 cm, then what is the area (in cm^2) of triangle PQR?

एक त्रिभुज PQR में, PX, QR का द्विभाजक है। PX, कोण P का द्विभाजक है। यदि PQ = 12 से.मी. तथा QX = 3 से.मी. है, तो त्रिभुज PQR का क्षेत्रफल (से.मी.² में) क्या है?

Options:

- 1) $12\sqrt{3}$
- 2) $8\sqrt{15}$
- 3) $18\sqrt{2}$
- 4) $9\sqrt{15}$

Correct Answer: $9\sqrt{15}$

Candidate Answer: [NOT ANSWERED]

QID : 314 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

In 1979, there was no liberalisation; there were few multinationals and not many billionaires. 'Social work' was done by activists in the field, and affluent men and women in cities 'gave to charity'. The norm in the social sector was to look at everything from the lens of 'but India is a poor country'. Child labour, for example, was accepted as a necessary evil that helped poor families survive. Concepts like social entrepreneurship, philanthropy and impact investing were unknown.

Into that world came Rippan – no connections, no wealth, not even a freedom struggle background, a regular middle-class guy, with a regular middle-class job but with an unshakeable conviction that Indian children were India's responsibility. He was about to set up an organisation that would seek to engage every citizen in the struggle for justice for children. Here was a group of people who talked of large-scale impact, of funding individuals and groups that would work all over India.

CRY not only survived Rippan's premature death, it grew and changed. In 1989, CRY's mission and values also struck a chord with top-notch professionals, who gave up jobs to take home salaries of ₹2,000 to ₹3,500 a month.

Today, the development sector in India and abroad is full of people who grew up in what I like to call the CRY School of Social Work and Management. People who discovered their calling in CRY and have gone on to do seminal work across the globe with their own initiatives for change.

Shantha Sinha, who pioneered work in eradicating child labour in Andhra Pradesh, came to Rippan after every funding door had closed. She got a 'yes' and an immediate cheque for the funds she needed to start her work which, today, has been replicated globally.

Andal Damodaran of the Indian Council for Child Welfare in Chennai, Gloria D'Souza, who founded Parivar Asha in Mumbai, Zakiya and John Kurrien of The Centre for Learning Resources in Pune, innovators in transforming education for children from adverse backgrounds – all of them were similarly supported.

Rippan's approach was simple: "What I can do, I must do." His allegiance clear: "CRY is my home, family and life." His heart belonged to children. Just an hour or so before he died, when one of his oldest and dearest colleagues asked him how he was feeling, he said, "I can see the faces of smiling children outside my window."

I cannot think of a better way to leave the planet.

Which world is being talked about in the first sentence of the second para of the passage?

Options:

- 1) World of rich people
- 2) World of religious people
- 3) World with no liberalisation, less millionaires and lesser ways to help others
- 4) World where people used to help needy ones enthusiastically and with much reverence

He was about to set up an organisation that would seek to engage every citizen in the struggle for justice for children. Here was a group of people who talked of large-scale impact, of funding individuals and groups that would work all over India.

CRY not only survived Rippan's premature death, it grew and changed. In 1989, CRY's mission and values also struck a chord with top-notch professionals, who gave up jobs to take home salaries of ₹2,000 to ₹3,500 a month.

Today, the development sector in India and abroad is full of people who grew up in what I like to call the CRY School of Social Work and Management. People who discovered their calling in CRY and have gone on to do seminal work across the globe with their own initiatives for change.

Shantha Sinha, who pioneered work in eradicating child labour in Andhra Pradesh, came to Rippan after every funding door had closed. She got a 'yes' and an immediate cheque for the funds she needed to start her work which, today, has been replicated globally.

Andal Damodaran of the Indian Council for Child Welfare in Chennai, Gloria D'Souza, who founded Parivar Asha in Mumbai, Zakiya and John Kurrien of The Centre for Learning Resources in Pune, innovators in transforming education for children from adverse backgrounds – all of them were similarly supported.

Rippan's approach was simple: "What I can do, I must do." His allegiance clear: "CRY is my home, family and life." His heart belonged to children. Just an hour or so before he died, when one of his oldest and dearest colleagues asked him how he was feeling, he said, "I can see the faces of smiling children outside my window."

I cannot think of a better way to leave the planet.

In 1979, there was no liberalisation; there were few multinationals and not many billionaires. 'Social work' was done by activists in the field, and affluent men and women in cities 'gave to charity'. The norm in the social sector was to look at everything from the lens of 'but India is a poor country'. Child labour, for example, was accepted as a necessary evil that helped poor families survive. Concepts like social entrepreneurship, philanthropy and impact investing were unknown.

Into that world came Rippan – no connections, no wealth, not even a freedom struggle background, a regular middle-class guy, with a regular middle-class job but with an unshakeable conviction that Indian children were India's responsibility. There is exciting news for butterfly enthusiasts. By studying 207 species of butterflies, scientists have created an evolutionary tree painting the detailed picture of butterfly relationships and evolution over time.

An international team of lepidopterists carried out DNA studies and carbon dating analysis to understand the age and characteristics of butterflies. By comparing and merging previous studies on butterflies, the researchers were able to create the new bigger and better evolutionary tree.

"We still have a long way to go, but this is the first comprehensive map of butterfly evolution," said Akito Y. Kawahara, associate professor at the Florida Museum of Natural History in a release. "Lots of previous studies cover butterfly evolution on smaller scales – by locality or taxon – but surprisingly few have reached across the breadth of butterfly diversity." Dr. Kawahara is the corresponding author of the paper published in *Current Biology*.

The report also supported previous studies that butterflies originated around 119 million years ago in the late Cretaceous period. After the mass extinction (65 million years ago), most of the butterflies diverged into many different groups. The butterfly species were placed in seven groups – Papilionidae, Hedylidae, Hesperiidae, Pieridae, Riodinidae, Lycaenidae and Nymphalidae.

"Our analyses support swallowtails (Papilionidae) as sister to all other butterflies, followed by skippers (Hesperiidae) and the nocturnal butterflies (Hedylidae) as sister to the remainder," says the report.

The whites (Pieridae) were supported as sister to brush-footed butterflies (Nymphalidae), blues and metalmarks (Lycaenidae and Riodinidae). Previously, swallowtails and birdwings were believed to have a common ancestor but the new study showed that they feed on different plants. "That tells us that butterflies and plants may have evolved together," Dr. Kawahara added. They also studied the association of butterflies with ants. Some butterfly larvae secrete sugars that serve as a meal for ants and the ant in return protects the larva from other predators. This is a well-studied symbiotic relationship. The scientists report that most of the blue butterflies and hairstreaks and some of the metalmark butterflies exhibit this behaviour. "We [India] have about one fifth of the known moths and butterflies represented in Indian collections (3,800 out of an estimated 20,000 species). The only way they could undertake the study was the fact that they have access to a good collection. We lack this in India," explained Smetacek.

Who are referred to as Lepidopterists?

Options:

- 1) Those who study or collect butterflies and moths.
- 2) Those who do study on ants.
- 3) Those who do study on birds.
- 4) Those who do study on plant eaters.

Correct Answer: Those who study or collect butterflies and moths.

QID : 324 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

A plant species that has outlived the dinosaurs, the Cycas circinalis, a 'living fossil' found only in the Western Ghats, faces the threat of extinction due to the over-harvesting of its leaves for commercial purposes.

While there are nine species of Cycas found across the country, almost all of which are classified as being endangered, the Cycas circinalis, found at altitudes between 1,500 and 1,800 meters, has traditionally been used by tribal communities for a variety of purposes. In the Nilgiris and other parts of the Western Ghats, where the plant is found, the seed is sometimes soaked in water (to remove a strong poison contained within) and ground into flour, after which it is eaten, while the seed is also said to be used in traditional, indigenous medicine.

However, over the last few decades, the leaves of the circinalis, which are used for ornamental purposes like for setting up 'pandals' have been harvested in bulk from the remaining plants, often leading to them becoming stunted and unable to reproduce and increase in number. With a single leaf costing as much as ₹ 25, the economic incentive to completely strip the plant of all its leaves in one harvest remains high for most people.

Shiny Miriam Rehel, Programme Co-ordinator for the Biodiversity Restoration Programme at Keystone Foundation, speaking to The Hindu, said that circinalis plants do not grow in large numbers in the wild, and the over exploitation of the leaves from the plant has caused a further decline over the last few decades.

The Keystone Foundation has been trying to promote the conservation of the species by encouraging forest-dependent communities to sustainably harvest the leaves from the circinalis. "We collect the seeds from the wild and raise it at our nursery on the Keystone campus. We then encourage farmers and tribal communities to grow the plants near to their dwellings or land holdings," said Ms. Rehel, who added that the conservation of the species needs to be assured through working with local communities, creating awareness of sustainably harvesting the leaves and ensuring that the plant itself remains healthy.

Speaking of their importance, Ms. Rehel said that not only the conservation of the endangered circinalis important to protect the livelihood of tribal communities, but also for biodiversity.

She said that the circinalis is an ideal host plant for ants, cupid butterflies and bats, and added that their protection will be a vital aspect of protecting the ecology of the Western Ghats in the long run.

Why cycas circinalis faces the threat of extinction?

Options:

- 1) Because of its low production
- 2) Because of excessive cattle grazing
- 3) Because of over-harvesting of its leaves
- 4) Because of pests

Correct Answer: Because of over-harvesting of its leaves

With a single leaf costing as much as ₹ 25, the economic incentive to completely strip the plant of all its leaves in one harvest remains high for most people.

Shiny Miriam Rehel, Programme Co-ordinator for the Biodiversity Restoration Programme at Keystone Foundation, speaking to The Hindu, said that circinalis plants do not grow in large numbers in the wild, and the over exploitation of the leaves from the plant has caused a further decline over the last few decades.

The Keystone Foundation has been trying to promote the conservation of the species by encouraging forest-dependent communities to sustainably harvest the leaves from the circinalis. "We collect the seeds from the wild and raise it at our nursery on the Keystone campus. We then encourage farmers and tribal communities to grow the plants near to their dwellings or land holdings," said Ms. Rehel, who added that the conservation of the species needs to be assured through working with local communities, creating awareness of sustainably harvesting the leaves and ensuring that the plant itself remains healthy. Speaking of their importance, Ms. Rehel said that not only the conservation of the endangered circinalis important to protect the livelihood of tribal communities, but also for biodiversity.

She said that the circinalis is an ideal host plant for ants, cupid butterflies and bats, and added that their protection will be a vital aspect of protecting the ecology of the Western Ghats in the long run.

What else other than over-harvesting has contributed in decline of Cycas circinalis?

Options:

- 1) Consumption by wildlife
- 2) The small scale growth of the plant
- 3) The high cost of the plant
- 4) The pollution of air and water

Correct Answer: The small scale growth of the plant

Candidate Answer: The high cost of the plant

QID : 328 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

A plant species that has outlived the dinosaurs, the Cycas circinalis, a 'living fossil' found only in the Western Ghats, faces the threat of extinction due to the over-harvesting of its leaves for commercial purposes.

While there are nine species of Cycas found across the country, almost all of which are classified as being endangered, the Cycas circinalis, found at altitudes between 1,500 and 1,800 meters, has traditionally been used by tribal communities for a variety of purposes. In the Nilgiris and other parts of the Western Ghats, where the plant is found, the seed is sometimes soaked in water (to remove a strong poison contained within) and ground into flour, after which it is eaten, while the seed is also said to be used in traditional, indigenous medicine.

However, over the last few decades, the leaves of the circinalis, which are used for ornamental purposes like for setting up 'pandals' have been harvested in bulk from the remaining plants, often leading to them becoming stunted and unable to reproduce and increase in number. With a single leaf costing as much as ₹ 25, the economic incentive to completely strip the plant of all its leaves in one harvest remains high for most people.

Why the conservation of Cycas circinalis important?

Options:

- 1) To ensure the livelihood of tribal communities and to protect biodiversity
- 2) To establish a business of selling it
- 3) To prevent its population from increasing
- 4) To prevent its stunted growth

Correct Answer: To ensure the livelihood of tribal communities and to protect biodiversity

Candidate Answer: To ensure the livelihood of tribal communities and to protect biodiversity

It is interesting to note contemporary storytellers such as Vikram Sridhar have stepped out of the traditional boundaries of storytelling to embrace drama. While storytelling might bring to mind grandma's tales complete with myths and morals, Sridhar believes these stories can be tweaked for a contemporary retelling. Sridhar, who has been a theatre practitioner for 15 years felt stories could be used to draw attention to social issues.

"I had to think how I could be different from informal storytellers and mould my stories to interest adults and children. I had a strong theatre background, had worked in a corporate set-up and was deeply interested in heritage and conservation. I decided to bring my interests and strengths together into performance storytelling," says Sridhar.

Based in Bengaluru, Vikram followed his passion for storytelling after doing his engineering and MBA.

"I used to travel a lot. In many places in Europe and Singapore, I witnessed 'Open Night' where a story, poetry or music was performed at public spaces or coffee shops in 10-minute slots. This made me think that we need larger versions of open night and stories are a strong medium to get a message across." Sridhar is having a story session at Tipu's armoury thanks to Indian National Trust for Arts and Cultural Heritage (INTACH), who had done restoration work at the armoury more than 15 years ago. "The armoury is totally in neglect," says Meera Iyer, Convenor, INTACH-Bangalore Chapter.

"Storytelling is also a way to bring attention to the monument, and how it can be given a focus and use. A building that is used often, automatically has the greater chance of preservation."

"I will not be using mike or gadgets," Sridhar says. "The audience will get stories of the armoury and more. The history of Karnataka's Mysore pak will be traced as well as the tale of the iron lady, Onake Obavva who fought the forces of Hyder Ali in the 18th century single-handedly with a pestle (Onake) in the kingdom of Chitradurga."

The transition from stories to drama was due to?

Options:

- 1) Sridhar's conviction that stories can be used to concentrate on social issues.
- 2) His background in theatre.
- 3) His interest in drama.
- 4) His need to step out of traditional boundaries

Correct Answer: Sridhar's conviction that stories can be used to concentrate on social issues.

Candidate Answer: His interest in drama.

Volcanic eruptions create beautiful surreal panorama like the unique landscape in Turkey. Here, rock structures of different shapes and sizes are a result of volcanic outbursts. Called "Fairy Chimneys" of Goreme in the Cappadocia region, Turkey, these rock sites are a major tourist attraction. Cappadocia lies in Central Anatolia in Turkey with the Taurus Mountains in the south separating it from the Mediterranean Sea. The rock formations that we see today can be traced back to millions of years. Several volcanic eruptions through deep fractures threw up rocks, lava, ash and other materials. After the eruption, a dense ash covered the entire area. Soon the ejected ash solidified into a soft/porous rock called "tuff".

The soft rocks were exposed to sub aerial erosion by wind, water and climatic changes (temperature changes). The rocks expanded in summer as they heated up, and broke up in winter as they froze. Added to this, the icy water collected in the cracks led to disintegration. Cappadocia gets heavy rain, and this too has played its part in altering the landscape. Rainwater has created sweeping curves on the sides of the valleys. The rivers washed away the eroded pieces of rocks and the harder rocks stayed on. Today, you see them in different shapes – capped chimneys, pillars, mushrooms and conical formations. As erosion constantly changes the landscape of the rock structures in Cappadocia, it can pose a danger to the habitation.

What is 'tuff'?

Options:

- 1) Solidified ash
- 2) A type of volcano
- 3) Local name for the chimneys
- 4) Dense rocks

Rainwater has created sweeping curves on the sides of the valleys. The rivers washed away the eroded pieces of rocks and the harder rocks stayed on. Today, you see them in different shapes – capped chimneys, pillars, mushrooms and conical formations. As erosion constantly changes the landscape of the rock structures in Cappadocia, it can pose a danger to the habitation.

Why are there curves on the sides of the valley?

Options:

- 1) Due to winds
- 2) Due to changing temperature
- 3) Due to rain water
- 4) Due to human activity

Correct Answer: Due to rain water

Candidate Answer: Due to rain water

Volcanic eruptions create beautiful surreal panorama like the unique landscape in Turkey. Here, rock structures of different shapes and sizes are a result of volcanic outbursts. Called "Fairy Chimneys" of Goreme in the Cappadocia region, Turkey, these rock sites are a major tourist attraction. Cappadocia lies in Central Anatolia in Turkey with the Taurus Mountains in the south separating it from the Mediterranean Sea. The rock formations have been gradually eroded back to millions of years. Several volcanic eruptions through deep fractures threw up rocks, lava, ash and other materials. After the eruption, a dense ash covered the entire area. Soon the ejected ash solidified into a soft/porous rock called "tuff".

The soft rocks were exposed to sub aerial erosion by wind, water and climatic changes (temperature changes). The rocks expanded in summer as they heated up, and broke up in winter as they froze. Added to this, the icy water collected in the cracks led to disintegration. Cappadocia gets heavy rain, and this too has played its part in altering the landscape. Rainwater has created sweeping curves on the sides of the valleys. The rivers washed away the eroded pieces of rocks and the harder rocks stayed on. Today, you see them in different shapes – capped chimneys, pillars, mushrooms and conical formations. As erosion constantly changes the landscape of the rock structures in Cappadocia, it can pose a danger to the habitation.

How old are these rock formations?

Options:

- 1) Billions of years
- 2) Thousands of years
- 3) Millions of years
- 4) Hundreds of years

Correct Answer: Millions of years

Candidate Answer: Millions of years

The Berber, are a group of people indigenous to North Africa. In the Nalut district of the Tripolitania region, Ghadames, an oasis town is known as the "pearl of the desert". It is one of the oldest pre-Saharan cities and a grand example of a traditional settlement. Flying over, I was surprised to see just houses and more houses. There didn't seem to be any pathways or alleys. Puzzled I flew down to investigate. I found that each house is built in such a way that it hangs over the alleys creating an underground network of passages. The ground floor of the house is used to store supplies, the next floor is for the use of the family and the open-air terraces are reserved for women. They were talking a language I did not understand. I later learnt it was Ghadamès, a Berber language.

Towards the end of the month, for three days the old city of Ghadames comes alive with feasting, singing and dancing. It happens at the end of the date harvest. When all the work is done, the people head to the city's World Heritage-listed old quarter to eat dates and celebrate. The people of the old quarter moved out in the mid-1980s, and live in the modern town. But, on this occasion they return to their family homes in the old city. They throw open the doors for singing, dancing and other festivities. The covered alleys provide shelter from the hot Sahara sun.

'The Berber' refers to:

Options:

- 1) A group of settlements in Tripolitania region
- 2) A group of people
- 3) A species of native animals of North Africa
- 4) An oasis town

Correct Answer: A group of people

Candidate Answer: A group of settlements in Tripolitania region

While flying over why we won't see any pathways in Ghadames?

Options:

- 1) The people walk from roof top to roof top.
- 2) Houses are built in such a way that they cover the pathways.
- 3) The pathways are built underground
- 4) In those days there was no concept of pathways.

Correct Answer: Houses are built in such a way that they cover the pathways.

Candidate Answer: The pathways are built underground

The table given below shows the production of maize by 5 different states as a percentage of total production. Each state produces only maize and rice. There are three types of rice – R_1 , R_2 and R_3 . The table also shows the R_1 type of rice produced as a percentage of total rice production and the ratio of R_2 and R_3 type of rice. Total production by each state is 625000.

नीचे दी गई तालिका 5 विभिन्न राज्यों द्वारा किए गए मक्के के उत्पादन को कुल उत्पादन के प्रतिशत के रूप में दर्शाती है। प्रत्येक राज्य केवल मक्का तथा चावल का ही उत्पादन करता है। चावल के तीन प्रकार – R_1 , R_2 तथा R_3 हैं। यह तालिका R_1 प्रकार के चावल के उत्पादन को कुल चावल के उत्पादन के प्रतिशत के रूप में दर्शाती है तथा R_2 तथा R_3 प्रकार के चावल के अनुपात को दर्शाती है। प्रत्येक राज्य द्वारा कुल उत्पादन 625000 है।

QID : 214 - Read the passage carefully and select the best answer to each question out of the given four alternatives.

The conclusion of World Trade Organization's 11th biennial ministerial conference at Buenos Aires was worrisome. From an Indian standpoint, there was no loss as status quo continues in the most important issue: the right to continue the food security programme by using support prices. But the inability of the negotiators to reach even one substantive outcome suggests that WTO's efficacy is under question. As a 164-country multilateral organisation dedicated to crafting rules of trade through consensus, WTO represents the optimal bet for developing countries such as India. Strengthening WTO is in India's best interest.

Perhaps the biggest threat to WTO's efficacy today is the attitude of the US. The world's largest economy appears to have lost faith in the organisation and has begun to undermine one of its most successful segments, the dispute redressal mechanism. This is significant as the US has been directly involved in nearly half of all cases brought to WTO. Separately, large groups of countries decided to pursue negotiations on e-commerce, investment facilitation and removal of trade obstacles for medium and small scale industries. By itself this should not weaken WTO. But it comes at a time when there is growing frustration with gridlock at WTO.

India did well to defend its position on its food security programme. The envisaged reform package which will see a greater use of direct cash transfers to beneficiaries will be in sync with what developed countries do. But it's important for India to enhance its efforts to reinvigorate WTO. In this context, India's plan to organise a meeting of some countries early next year is a step in the right direction. WTO represents the best available platform to accommodate interests of a diverse set of nations. Therefore, India should be at the forefront of moves to fortify it.

Why was the WTO's 11th biennial ministerial conference worrisome?

Options:

- 1) Denial of states quo.
- 2) Inability of negotiators to reach to substantive outcome for the problems.
- 3) Rift in the policies suggested by WTO on IPR.
- 4) Non-cooperation from Indian government on various matters.

Correct Answer: Inability of negotiators to reach to substantive outcome for the problems.

India did well to defend its position on its food security programme. The envisaged reform package which will see a greater use of direct cash transfers to beneficiaries will be in sync with what developed countries do. But it's important for India to enhance its efforts to reinvigorate WTO. In this context, India's plan to organise a meeting of some countries early next year is a step in the right direction. WTO represents the best available platform to accommodate interests of a diverse set of nations. Therefore, India should be at the forefront of moves to fortify it.

Which of the following nation is keen to fortify its interest on WTO platform?

Options:

- 1) USA
- 2) Japan
- 3) Russia
- 4) India

Correct Answer: India

Candidate Answer: India

QID : 217 - Read the passage carefully and select the best answer to each question out of the given four alternatives.

The conclusion of World Trade Organization's 11th biennial ministerial conference at Buenos Aires was worrisome. From an Indian standpoint, there was no loss as status quo continues in the most important issue: the right to continue the food security programme by using support prices. But the inability of the negotiators to reach even one substantive outcome suggests that WTO's efficacy is under question. As a 164-country multilateral organisation dedicated to crafting rules of trade through consensus, WTO represents the optimal bet for developing countries such as India. Strengthening WTO is in India's best interest.

Perhaps the biggest threat to WTO's efficacy today is the attitude of the US. The world's largest economy appears to have lost faith in the organisation and has begun to undermine one of its most successful segments, the dispute redressal mechanism. This is significant as the US has been directly involved in nearly half of all cases brought to WTO. Separately, large groups of countries decided to pursue negotiations on e-commerce, investment facilitation and removal of trade obstacles for medium and small scale industries. By itself this should not weaken WTO. But it comes at a time when there is growing frustration with gridlock at WTO.

One should consciously engage in activities that will nourish your soul. Just as we nourish the body, we need to nurture the soul to connect to the creative power of the universe and to manifest joy in our lives. Often, we forget to address the soul, lost as we are in a jungle of material and sensual pleasures. But the more you embrace what feeds your soul, the happier you become. So if you want to enjoy the abundance of life, engage in what enriches your soul. Nurturing the soul is all about finding calm amidst chaos. There are a number of practices that empower people towards this end including silent contemplation, various forms of meditation, yoga and tai chi. However, the rigor and discipline involved in the pursuit of such practices often seems to discourage people. Add to this, the temptations of the material world that leave little time and motivation for anyone to pursue the spiritual path. Poet Walt Whitman declared: "Whatever satisfies the soul is truth". The good news is that simple, everyday activities can also nutrify the soul — like spending time in the midst of nature, dancing in the rain or just putting thoughts on paper. Do whatever is calming and pleases you. Creative pursuits are particularly appealing as inside each one of us, there is an artist craving for release and awaiting an opportunity for expression. One of the ways to indulge the artist within is to get started with the practice of any one or more of the creative art forms such as music, singing, dancing, acting, drawing, painting, sculpting, poetry, fiction or essay writing.

When you engage in such soul nourishing activities, all thought and energy gets focused toward goal accomplishment. At this point, you will find that even unknown forces of the universe are conniving to assist you in your amateurish but sincere attempts. As you progress, you are motivated to do better. You touch and access a faculty, a part of you that you never knew existed. Your inner artist is unleashed, baring the beauty of your soul that has found a fond medium of expression. For instance, a sculptor's soul is seen in his artwork; a musician's in his compositions; an actor's in his acting, a painter's in his paintings and so on. It is immaterial whether your effort is an immaculate artwork or just a clumsy attempt by a layperson. The idea is to try, be inspired and to create giving free rein to the mind. As Michelangelo remarked: "I saw the angel in the marble and carved until I set him free"!

According to the passage, what makes us really happy?**Options:**

- 1) A soulful music.
- 2) A soulful sculptures art.
- 3) Freeing our mind.
- 4) Embracing what feeds our soul.

Correct Answer: Embracing what feeds our soul.**Candidate Answer:** Embracing what feeds our soul.**QID : 220** - Read the passage carefully and select the best answer to each question out of the given four alternatives.

The saddest part of life lies not in the act of dying, but in failing to truly live while we are alive. Too many of us play small with our lives, never letting the fullness of our humanity see the light of day. I've learned that what really counts in life, in the end, is not how many toys we have collected or how much money we've accumulated, but how many of our talents we have liberated and used for a purpose that adds value to this world. What truly matters most are the lives we have touched and the legacy that we have left. Tolstoy put it so well when he wrote: "We live for ourselves only when we live for others." It took me forty years to discover this simple point of wisdom.

Forty long years to discover that success cannot really be pursued. Success ensues and flows into your life as the unintended yet inevitable byproduct of a life spent enriching the lives of other people. When you shift your daily focus from a compulsion to survive towards a lifelong commitment to serve, your existence cannot help but explode into success. I still can't believe that I had to wait until the "half-time" of my life to figure out that true fulfillment as a human being comes not from achieving those grand gestures that put us on the front pages of the newspapers and business magazines, but instead from those basic and incremental acts of decency that each one of us has the privilege to practice each and every day if we simply make the choice to do so.

Mother Teresa, a great leader of human hearts if ever there was one, said it best: "There are no great acts, only small acts done with great love." I learned this the hard way in my life. Until recently, I had been so busy striving, I had missed out on living. I was so busy chasing life's big pleasures that I had missed out on the little ones, those micro joys that weave themselves in and out of our lives on a daily basis but often go unnoticed. My days were overscheduled, my mind was overworked and my spirit was underfed.

According to the passage, what does "failing to truly live while we are alive means."?

Options:

- 1) End up thinking of death all our lives.
- 2) Never letting the fullness of our humanity see the light of day.
- 3) Focus on basic and incremental acts of decency.
- 4) Over scheduling our days and over paying ourselves.

Correct Answer: Never letting the fullness of our humanity see the light of day.

Teaching about compassion and empathy in schools can help deal with problems of climate change and environmental degradation," says Barbara Maas, secretary, Standing Committee for Environment and Conservation, International Buddhist Confederation (IBC). She was in New Delhi to participate in the IBC's governing council meeting, December 10-11, 2017. "We started an awareness campaign in the year 2005-2006 with H H The Dalai Lama when we learnt that tiger skins were being traded in China and Tibet. At that time, I was not a Buddhist; I wrote to the Dalai Lama asking him to say that 'this is harmful' and he wrote back to say, "We will stop this." He used very strong words during the Kalachakra in 2006, when he said, 'If he sees people wearing fur and skins, he doesn't feel like living.' This sent huge shock waves in the Himalayan community. Within six months, in Lhasa, people ripped the fur trim of their tubba, the traditional Tibetan dress.

The messenger was ideal and the audience was receptive," says Maas who is a conservationist. She has studied the battered fox's behavioral ecology in Serengeti, Africa. She heads the endangered species conservation at the Nature and Biodiversity Conservation Union (NABU) International Foundation for Nature, Berlin. "I met Samdhong Rinpoche, The Karmapa, HH the Dalai Lama and Geshe Lhakdor and I thought, if by being a Buddhist, you become like this, I am going for it," says Maas, who led the IBC initiative for including the Buddhist perspective to the global discourse on climate change by presenting the statement, 'The Time to Act is Now: a Buddhist Declaration on Climate Change,' at COP21 in Paris.

"It was for the first time in the history of Buddhism that leaders of different sanghas came together to take a stand on anything! The statement lists a couple of important things: the first is that we amass things that we don't need; there is overpopulation; we need to live with contentment and deal with each other and the environment with love and compassion," elaborates Maas. She is an ardent advocate of a vegan diet because "consuming meat and milk globally contributes more to climate change than all "transport in the world."

Turning vegetarian or vegan usually requires complete change of perspective before one gives up eating their favorite food. What are the Buddhist ways to bring about this kind of change at the individual level? "To change our behavior, Buddhism is an ideal vehicle; it made me a more contented person," says Maas, who grew up in Germany, as a sausage chomping, meat-loving individual. She says, "If I can change, so can anybody".

According to the passage, how can studying compassion and empathy in schools help?

Options:

- 1) It can help us understand and connect Buddhism.
- 2) It can help deal with problems of climate change and environmental degradation.
- 3) It can change our behaviours and make us more content person.
- 4) It can help us in turning vegetarian.

Correct Answer: It can help deal with problems of climate change and environmental degradation.

Candidate Answer: It can help deal with problems of climate change and environmental degradation.

QID : 230 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

Teaching about compassion and empathy in schools can help deal with problems of climate change and environmental degradation," says Barbara Maas, secretary, Standing Committee for Environment and Conservation, International Buddhist Confederation (IBC). She was in New Delhi to participate in the IBC's governing council meeting, December 10-11, 2017. "We started an awareness campaign in the year 2005-2006 with H H The Dalai Lama when we learnt that tiger skins were being traded in China and Tibet. At that time, I was not a Buddhist; I wrote to the Dalai Lama asking him to say that 'this is harmful' and he wrote back to say, "We will stop this." He used very strong words during the Kalachakra in 2006, when he said, 'If he sees people wearing fur and skins, he doesn't feel like living.' This sent huge shock waves in the Himalayan community. Within six months, in Lhasa, people ripped the fur trim of their tubba, the traditional Tibetan dress.

The messenger was ideal and the audience was receptive," says Maas who is a conservationist. She has studied the battered fox's behavioral ecology in Serengeti, Africa. She heads the endangered species conservation at the Nature and Biodiversity Conservation Union (NABU) International Foundation for Nature, Berlin. "I met Samdhong Rinpoche, The Karmapa, HH the Dalai Lama and Geshe Lhakdor and I thought, if by being a Buddhist, you become like this, I am going for it," says Maas, who led the IBC initiative for including the Buddhist perspective to the global discourse on climate change by presenting the statement, 'The Time to Act is Now: a Buddhist Declaration on Climate Change,' at COP21 in Paris.

"It was for the first time in the history of Buddhism that leaders of different sanghas came together to take a stand on anything! The statement lists a couple of important things: the first is that we amass things that we don't need; there is overpopulation; we need to live with contentment and deal with each other and the environment with love and compassion," elaborates Maas. According to the passage, what do you infer from "The messenger was ideal and the audience was receptive"?

Options:

- 1) It means that the audience found the messenger attractive and that they wanted to listen to him more and more.
- 2) It means that audience's reaction goes hand in hand with the speaker's effectiveness.
- 3) It means that HH Dalai Lama was a perfect choice of messenger for the message to be received by the audience.
- 4) It means that messenger was tested and was working properly.

Correct Answer: It means that HH Dalai Lama was a perfect choice of messenger for the message to be received by the audience.

Candidate Answer: It means that audience's reaction goes hand in hand with the speaker's effectiveness.

Doing an internship at the University of Lille in France, I almost always found myself stuck whenever I had to speak to non-Indians about India or on anything 'Indian'. This was more because of the subtle differences in the way the French understood India in comparison to what I thought was 'Indian'. For instance, when I, or any Indian for that matter, say 'Hindi' is an Indian language, what it means is that it is one of the languages widely spoken in India. This need not be similar to the understanding that the French would have when they hear of 'Hindi' as an Indian language. Because for them Hindi then becomes the only language spoken in India. This is a natural inference that the French, Germans, Italians and many other European nationals would tend to make, because that is generally how it is in their own respective countries. The risk of such inappropriate generalisations made about 'Indian' is not restricted to language alone but also for India's landscape, cuisine, movies, music, climate, economic development and even political ideologies. The magnitude of diversity of one European country can be easily compared to that of one of the Indian States, isn't it? Can they imagine that India is one country whose diversity can be equated to that of the entire European continent? The onus is upon us to go ahead and clarify the nuances in 'Indianness' while we converse. But why should one do so? How does it even matter to clarify?

Why do some French people think that Hindi is the only Indian language?

It was a bittersweet moment for me when I found out that I had been selected for the Sakura Science Exchange programme, a Robotics and IoT workshop in Japan. A fully-funded opportunity of a lifetime. Fly off to Saitama without a care on the world, and all I had to do was put into practice what I love to do – computer science. The bitter part of the episode – that I would lose two weeks of IB education, an almost literal mountain to cover when I got back – was quickly forgotten when I envisioned myself programming robots in the country that gave us Anime and sushi! It was with the eagerness to have an extended vacation in an un-visited land, and the opportunity to learn more about a subject that I am passionate about, that I headed to the Kempegowda International Airport outside Bengaluru. Little did I know this would be the experience of a lifetime, more for the endearing values of the Japanese culture that made their mark on me than anything else. The first feature of Japanese society that called out to me was the Discipline. Walking into the Narita International Airport, used as I was to the noisy crowds back in India, I quite literally lost my breath to the sight that awaited me. Be it the security check or baggage claim, somehow there was a silence that felt right. Everyone went about their activities without any confusion. And, contrary to the bharatiya custom of lazy pot-bellied officials, every guard and all counter personnel did what they were supposed to do to ensure this flow was maintained.

What was it that the writer did not like about his trip to Japan?

Options:

- 1) That the trip was so short
- 2) That he would be compelled to eat sushi
- 3) That he would miss a fortnight worth of IB education

The bitter part of the episode – that I would lose two weeks of IB education, an almost literal mountain to cover when I got back – was quickly forgotten when I envisioned myself programming robots in the country that gave us Anime and sushi! It was with the eagerness to have an extended vacation in an un-visited land, and the opportunity to learn more about a subject that I am passionate about, that I headed to the Kempegowda International Airport outside Bengaluru. Little did I know this would be the experience of a lifetime, more for the endearing values of the Japanese culture that made their mark on me than anything else. The first feature of Japanese society that called out to me was the Discipline. Walking into the Narita International Airport, used as I was to the noisy crowds back in India, I quite literally lost my breath to the sight that awaited me. Be it the security check or baggage claim, somehow there was a silence that felt right. Everyone went about their activities without any confusion. And, contrary to the bharatiya custom of lazy pot-bellied officials, every guard and all counter personnel did what they were supposed to do to ensure this flow was maintained.

What did the writer notice when he arrived at Narita International Airport?

Options:

- 1) The bags arriving on time in baggage claim
- 2) The cleanliness
- 3) That there was no security check
- 4) The silence

Correct Answer: The silence

Candidate Answer: The silence

What is Gandhian philosophy? It is the religious and social ideas adopted and developed by Gandhi, first during his period in South Africa from 1893 to 1914, and later of course in India. These ideas have been further developed by later "Gandhians", most notably, in India by Vinoba Bhave and Jayaprakash Narayan. Outside of India some of the work of, for example, Martin Luther King Jr. can also be viewed in this light. Understanding the universe to be an organic whole, the philosophy exists on several planes - the spiritual or religious, moral, political, economic, social, individual and collective. The spiritual or religious element, and God, is at its core. Human nature is regarded as fundamentally virtuous. All individuals are believed to be capable of high moral development, and of reform. The twin cardinal principles of Gandhi's thought are truth and nonviolence. It should be remembered that the English word "truth" is an imperfect translation of the Sanskrit, "satya", and "non-violence", an even more imperfect translation of "ahimsa". Derived from "sat" - "that which exists" - "satya" contains a dimension of meaning not usually associated by English speakers with the word "truth". There are other variations, too, which we need not go into here. For Gandhi, truth is the relative truth of truthfulness in word and deed, and the absolute truth - the Ultimate Reality. This ultimate truth is God (as God is also Truth) and morality - the moral laws and code - its basis. Ahimsa, far from meaning mere peacefulness or the absence of overt violence, is understood by Gandhi to denote active love - the pole opposite of violence, or "Himsa", in every sense. The ultimate station Gandhi assigns non violence stems from two main points. First, if according to the Divine Reality all life is one, then all violence committed towards another is violence towards oneself, towards the collective, whole self, and thus "self"-destructive and counter to the universal law of life, which is love. Second, Gandhi believed that ahimsa is the most powerful force in existence. Had himsa been superior to ahimsa, humankind would long ago have succeeded in destroying itself. The human race certainly could not have progressed as far as it has, even if universal justice remains far off the horizon. From both viewpoints, non violence or love is regarded as the highest law of humankind.

What are the twin cardinal principles of Gandhi's thought?

Options:

- 1) spirituality and morality
- 2) truth and non violence
- 3) ethics and social responsibility
- 4) Individual and collective sharing

What is Gandhian philosophy? It is the religious and social ideas adopted and developed by Gandhi, first during his period in South Africa from 1893 to 1914, and later of course in India. These ideas have been further developed by later "Gandhians", most notably, in India by Vinoba Bhave and Jayaprakash Narayan. Outside of India some of the work of, for example, Martin Luther King Jr. can also be viewed in this light. Understanding the universe to be an organic whole, the philosophy exists on several planes - the spiritual or religious, moral, political, economic, social, individual and collective. The spiritual or religious element, and God, is at its core. Human nature is regarded as fundamentally virtuous. All individuals are believed to be capable of high moral development, and of reform. The twin cardinal principles of Gandhi's thought are truth and nonviolence. It should be remembered that the English word "truth" is an imperfect translation of the Sanskrit, "satya", and "non-violence", an even more imperfect translation of "ahimsa". Derived from "sat" - "that which exists" - "satya" contains a dimension of meaning not usually associated by English speakers with the word "truth". There are other variations, too, which we need not go into here. For Gandhi, truth is the relative truth of truthfulness in word and deed, and the absolute truth - the Ultimate Reality. This ultimate truth is God (as God is also Truth) and morality - the moral laws and code - its basis. Ahimsa, far from meaning mere peacefulness or the absence of overt violence, is understood by Gandhi to denote active love - the pole opposite of violence, or "Himsa", in every sense. The ultimate station Gandhi assigns non violence stems from two main points. First, if according to the Divine Reality all life is one, then all violence committed towards another is violence towards oneself, towards the collective, whole self, and thus "self"-destructive and counter to the universal law of life, which is love. Second, Gandhi believed that ahimsa is the most powerful force in existence. Had himsa been superior to ahimsa, humankind would long ago have succeeded in destroying itself. The human race certainly could not have progressed as far as it has, even if universal justice remains far off the horizon. From both viewpoints, non violence or love is regarded as the highest law of humankind.

Public opinion may be passive and false or active and real. It is claimed in theory that all governments are ultimately based on the opinion or sanction of the governed. But we find that in practice the people's rights are often trodden down and tyranny and oppression are allowed to continue. The government does it not because the people want it to do so but because they are too idle, too uneducated and too disunited or timid to oppose the government. Such public opinion is passive and false and not an active verdict. But when we find people alert, intelligent and determined to let the government know their will, when they want to exercise actively their voice in the management of their country, we have an instance of true or active public opinion. True public opinion is formed by and expressed through the press, the platform, political parties and educational institutions. These have sacred duties to perform, duties on which depends the ultimate good of the entire community. The press today yields a tremendous influence, So it should support the causes and movements and condemn the wrong one's and thus teach people to form correct opinion. A free and fair press ventilates the grievances of the public. Thus a healthy relationship develops between the people and the government through out an unbiased press. Political parties also help to create and regulate opinions. No less important part is played by the educational Institutions which train the minds of the young people who will be the citizens of tomorrow. It has been said that modern Germany and China have been made by their universities. It is necessary that the young and the growing minds should imbibe the spirit of fellow-feeling, the spirit of tolerance, the habit of compromise, and show due regard for the feelings and opinion of others without which a democratic society cannot function, let alone succeed. When there is true awakening of the people, we shall have the real and conscious public opinion. And justice will reign on earth and truly will the voice of the people be the voice of God.

Who among the following has tremendous influence in forming the true public opinion?

Options:

- 1) Press
- 2) Political parties
- 3) Educational intuitions
- 4) God man

Correct Answer: Press

Candidate Answer: Press

It was for long the insurmountable peak for ODI batting, but one man might now have a template to score ODI double-centuries again and again. In Bengaluru, against Australia in 2013, Rohit Sharma reached 20 off 35th ball, 50 off the 71st, and the hundred in the 38th over of the innings. In Kolkata, against Sri Lanka in 2014, he was nearly caught for 4 off the 17th ball he faced, reached his 20th run off the 35th ball, but accelerated slightly earlier to bring up his century in the 32nd over of the innings. On a cold mid-week afternoon in Mohali this season, he was even slower to start, reaching 20 off 37 balls, 50 off 65 balls, and bringing up the hundred only in the 40th over. All three were ODI doubles. One time can be a charm, but to accelerate so *crazily* three times after having set up the innings and to make it look predictable is a perfect combination of skill, fitness and the right mental approach to ODI batting. You can be all amazed at how he manages to do it, but Rohit's reaction to it is typically relaxed. "That's my template, no?" he tends to ask. He remembers the innings clearly: reaching "50 off 70 balls", bringing up the hundred "near the 40th over", and then knowing that the bowlers can't get him out unless he makes a mistake. "That is my style of play," Rohit said. "You are set and seeing the ball nice and hard and you have understood what the bowlers are trying to do by then, and it's all about trying to play with the field once you get past 100. It's all about you not making a mistake and getting out. I am not saying it's impossible or difficult, but it's very unlikely the bowlers are going to get you out once you have scored a hundred." So it was all about me not making a mistake and batting as long as possible. That's what I did. There is no secret or formula to it. You just have to bat and not make any mistake. The ground is good, the pitch is nice and hard, so you can trust the bounce and play the shots."

The Amazon basin has been continuously inhabited for at least 10,000 years, possibly more. Its earliest inhabitants were stone-age peoples, living in hundreds of far-flung tribes, some tiny, others numbering in the tens of thousands. It was from the west that Europeans explorers first arrived. In 1541 a Spanish expedition from Quito, led by Gonzalo Pizarro, ran short of supplies while exploring east of the Andes in what is today Peru. Pizarro's cousin Francisco de Orellana offered to take 60 men along with the boats from the expedition and forage for supplies. De Orellana floated down the Rio Napo to its confluence with the Amazon, near Iquitos (Peru), and then to the mouth of the Amazon. Along the way his expedition suffered numerous attacks by Indians; some of the Indian warriors, they reported, were female, like the Amazons of Greek mythology, and thus the world's greatest river got its name. No one made a serious effort to claim this sweaty territory, however, until the Portuguese built a fort near the mouth of the river at Belém in 1616, and sent Pedro Teixeira up the river to Quito and back between 1637 and 1639. During the 17th and 18th centuries, Portuguese bandeirantes (groups of roaming adventurers) penetrated ever further into the rain forest in pursuit of gold and Indian slaves, exploring as far as present-day Rondônia, and the Guaporé and Madeira river valleys. Amazonian Indians had long used the sap from rubber trees to make waterproof bags and other items. European explorers recognized the potential value of natural latex, but were unable to market it because it tended to grow soft in the heat, or brittle in the cold, and thus had limited appeal outside the rain forest. However, in 1842 American Charles Goodyear developed vulcanization (made natural rubber durable) and in 1890 Ireland's John Dunlop patented pneumatic rubber tires. Soon there was an unquenchable demand for rubber in the recently industrialized USA and Europe, and the price of rubber on international markets soared. As profits skyrocketed, so did exploitation of the seringueiros, or rubber tappers, who were lured into the Amazon, mostly from the drought-stricken northeast, by the promise of prosperity only to be locked into a cruel system of virtual slavery dominated by seringalistas (owners of rubber-bearing forests). Rigged scales, hired guns, widespread illiteracy among the rubber tappers, and monopoly of sales and purchases all combined to perpetuate the workers' debt and misery. In addition, seringueiros had to contend with jungle fevers, Indian attacks and all manner of deprivation.

Its earliest inhabitants were stone-age peoples, living in hundreds of far-flung tribes, some tiny, others numbering in the tens of thousands. It was from the west that Europeans explorers first arrived. In 1541 a Spanish expedition from Quito, led by Gonzalo Pizarro, ran short of supplies while exploring east of the Andes in what is today Peru. Pizarro's cousin Francisco de Orellana offered to take 60 men along with the boats from the expedition and forage for supplies. De Orellana floated down the Rio Napo to its confluence with the Amazon, near Iquitos (Peru), and then to the mouth of the Amazon. Along the way his expedition suffered numerous attacks by Indians; some of the Indian warriors, they reported, were female, like the Amazons of Greek mythology, and thus the world's greatest river got its name. No one made a serious effort to claim this sweaty territory, however, until the Portuguese built a fort near the mouth of the river at Belém in 1616, and sent Pedro Teixeira up the river to Quito and back between 1637 and 1639. During the 17th and 18th centuries, Portuguese bandeirantes (groups of roaming adventurers) penetrated ever further into the rain forest in pursuit of gold and Indian slaves, exploring as far as present-day Rondônia, and the Guaporé and Madeira river valleys. Amazonian Indians had long used the sap from rubber trees to make waterproof bags and other items. European explorers recognized the potential value of natural latex, but were unable to market it because it tended to grow soft in the heat, or brittle in the cold, and thus had limited appeal outside the rain forest. However, in 1842 American Charles Goodyear developed vulcanization (made natural rubber durable) and in 1890 Ireland's John Dunlop patented pneumatic rubber tires. Soon there was an unquenchable demand for rubber in the recently industrialized USA and Europe, and the price of rubber on international markets soared. As profits skyrocketed, so did exploitation of the seringueiros, or rubber tappers, who were lured into the Amazon, mostly from the drought-stricken northeast, by the promise of prosperity only to be locked into a cruel system of virtual slavery dominated by seringalistas (owners of rubber-bearing forests). Rigged scales, hired guns, widespread illiteracy among the rubber tappers, and monopoly of sales and purchases all combined to perpetuate the workers' debt and misery. In addition, seringueiros had to contend with jungle fevers, Indian attacks and all manner of deprivation.

Eight north Indian Ocean countries, namely, Bangladesh, India, the Maldives, Myanmar, Oman, Pakistan, Sri Lanka and Thailand, were asked to contribute names so that a combined list could be compiled. Each country gave eight names and a combined list of 64 names was prepared. This list is currently in use, and all cyclones arising in the north Indian Ocean are named from this list, with one name from each country being used in turn. Almost 38 or 39 names from the list have been used up, but since many cyclones dissipate long before they hit land, their names rarely figure in the papers or other media. The names that people do know about, and remember are, naturally, those that were most destructive ones, or very recent. Aila, in 2009 is remembered with a shudder for the enormous destruction it caused in West Bengal and Bangladesh; Phaillin, also for the damage it caused when it hit the Odisha coast in 2013. Two harmless cyclones, which also might remain in people's memory, are the more recent ones of 2014 – Hudhud, which threatened the east coast of India and Nilofar, which was expected to, but did not, devastate the western coast. The names in the cyclone list are usually words one associates with storms; words which mean water or wind or lightning in various national languages. Sometimes they are names of other things – birds or flowers or precious stones. The name 'Aila', contributed by the Maldives means 'fire', the name 'Phaillin' from Thailand means sapphire, the name 'Hudhud' from Oman is the name of a bird, probably the hoopoe, and the name 'Nilofar', given by Pakistan, is the Urdu name of the lotus or water lily. The eight names suggested by India, and which are in the list of 64, are Agni, Akaash, Bijli, Jal, Leher, Megh, Sagar and Vayu, meaning in that order, fire, sky, lightning, water, wave, cloud, sea and wind. Five of these names (that is, up to Leher) have been used so far.

In mid-2012 I completed my first massive online open course, or MOOC, the kind widely offered by Coursera, EdX, Udacity and so on in partnership with different educational institutions. It was on clinical trials and ethical practices, offered by Johns Hopkins, on Coursera. This was shortly before the MOOC sensation hit India, and when Coursera, which was founded by two Stanford professors, itself was just a few months old. The MOOC bug had bit me. The course I'd completed was mainly designed for health care professionals who would be involved in actual clinical trials, not college students who had no prior knowledge of that area. I decided to enroll in the course because it was the only biology related course open at the time. However, I did see hope in that sometime in the future I'd be able to get a glimpse of what classes are like in the hallowed halls of major educational institutions around the world. By early 2013, Coursera and EdX had partnered with so many educational institutions and expanded their course offerings to include everything from food and nutrition to Greek mythology to business, that I was spoilt for choice. I spent hours going through course catalogues and poring over course descriptions, almost delirious with excitement at the fact that I was actually going to be able to take classes offered by universities I had only dreamt of attending.

The course I'd completed was mainly designed for health care professionals who would be involved in actual clinical trials, not college students who had no prior knowledge of that area. I decided to enroll in the course because it was the only biology related course open at the time. However, I did see hope in that sometime in the future I'd be able to get a glimpse of what classes are like in the hallowed halls of major educational institutions around the world. By early 2013, Coursera and EdX had partnered with so many educational institutions and expanded their course offerings to include everything from food and nutrition to Greek mythology to business, that I was spoilt for choice. I spent hours going through course catalogues and poring over course descriptions, almost delirious with excitement at the fact that I was actually going to be able to take classes offered by universities I had only dreamt of attending.

The course the author completed on MOOC was related to which subject?

Options:

- 1) Biology
- 2) Nutrition
- 3) Mythology
- 4) Business

Correct Answer: Biology

Candidate Answer: Biology

QID : 252 - Read the passage carefully and choose the best answer to each question out of the four alternatives.

In mid-2012 I completed my first massive online open course, or MOOC, the kind widely offered by Coursera, EdX, Udacity and so on in partnership with different educational institutions. It was on clinical trials and ethical practices, offered by Johns Hopkins, on Coursera. This was shortly before the MOOC sensation hit India, and when Coursera, which was founded by two Stanford professors, itself was just a few months old. The MOOC bug had bit me. Q: But recent episodes of suspected insider trading through WhatsApp groups, in which analysts shared prescient tip-offs about upcoming results for top listed companies, reveals that the framework remains porous.

R: The Ministry of Corporate Affairs and the Securities Exchange Board of India (SEBI) have lately redoubled their efforts to put in place a water-tight governance framework for listed firms.

S: Initiating a probe into this episode, SEBI has interrogated analysts, conducted raids on stock brokers and deployed search-and-seizure powers to confiscate laptops and mobile phones.

P: The basic reform they need is to change their holding structure to give them autonomy, as well as accountability, not a promise of no government interference.

Q: PSBs need systemic reform to overhaul their current decision-making structure and culture.

R: If the government does not want to free the banks from majority state ownership, it could at least put them at arm's remove, by creating a holding company that would hold the PSB equity, appoint PSB boards and supervise their functioning.

S: It is surprising that after appointing the Banks Board Bureau, it has been given little role in reforming the PSBs.

QID : 214 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

Just as space permeates everything in the universe, love permeates every part, every aspect of creation. If there is one answer to the question, "How and why does this world exist?" the answer, in one word, is 'Love'. Rather, the answer is 'Pure Love', since the word 'love' has lost its meaning.

Your very existence is an expression of pure unconditional love of the Source (you may call it Consciousness, Creator, God, Divine Self). This is the truth of your being. True love transcends both love and hatred. It is unconditional, unquestioning, boundless, unchanging love. It is overflowing love of the Source for the Source through all of creation.

True love is way beyond the personalized love that two or more individuals assert on one another. Personalized love, though apparently selfless, is rooted in desires and conditional satisfaction.

We have been brought up in a society that judges love based on conditions. We have been made to believe that we can receive love only when we fit into people's expectations. If we are not good enough, we will be deprived of love.

These beliefs have influenced the collective psyche of families, groups, communities, and societies since generations to such an extent that love has been reduced to fear of denial.

We need to shift from the paradigm of false conditional love to the essence of pure unconditional love .

The experience of true love comes with surrender of the false 'I', in letting go of the feeling of separateness. Without this sacrifice, it is not possible to attain divine love. When this separate 'I' is discarded, you embrace everything in oneness and catch a glimpse of pure love.

True love can be experienced only through giving, not by demanding. People who exist in your life are not here to love you. They are here to remind you that you are the Source of Love.

By knowing that you are the Source of love, you can love yourself, instead of waiting to receive love from the world. Ask yourself, "Why do I need an agent to love myself?" Waiting for the world to love you, is like hiring an agent to love yourself!

It is time for you to honor yourself as the Source of love. You have undertaken this human journey to realize and express the boundless love that you truly are.

What can be the suitable title to the passage ?

Options:

- 1) Understanding the true love
- 2) Conditional love
- 3) Role of 'I' in love
- 4) Selflessness

Correct Answer: Understanding the true love

True love can be experienced only through giving, not by demanding. People who exist in your life are not here to love you. They are here to remind you that you are the Source of Love.

By knowing that you are the Source of love, you can love yourself, instead of waiting to receive love from the world. Ask yourself, "Why do I need an agent to love myself?" Waiting for the world to love you, is like hiring an agent to love yourself!

It is time for you to honor yourself as the Source of love. You have undertaken this human journey to realize and express the boundless love that you truly are.

According to the passage, whom to honour as the source of love?

Options:

- 1) Family
- 2) Community
- 3) Society
- 4) Yourself

Correct Answer: Yourself

Candidate Answer: Yourself

QID : 218 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

Just as space permeates everything in the universe, love permeates every part, every aspect of creation. If there is one answer to the question, "How and why does this world exist?" the answer, in one word, is 'Love'. Rather, the answer is 'Pure Love', since the word 'love' has lost its meaning.

Your very existence is an expression of pure unconditional love of the Source (you may call it Consciousness, Creator, God, Divine Self). This is the truth of your being. True love transcends both love and hatred. It is unconditional, unquestioning, boundless, unchanging love. It is overflowing love of the Source for the Source through all of creation.

True love is way beyond the personalized love that two or more individuals assert on one another. Personalized love, though apparently selfless, is rooted in desires and conditional satisfaction.

We have been brought up in a society that judges love based on conditions. We have been made to believe that we can receive love only when we fit into people's expectations. If we are not good enough, we will be deprived of love.

These beliefs have influenced the collective psyche of families, groups, communities, and societies since generations to such an extent that love has been reduced to fear of denial.

We need to shift from the paradigm of false conditional love to the essence of pure unconditional love .

The experience of true love comes with surrender of the false 'I', in letting go of the feeling of separateness. Without this sacrifice, it is not possible to attain divine love. When this separate 'I' is discarded, you embrace everything in oneness and catch a glimpse of pure love.

True love can be experienced only through giving, not by demanding. People who exist in your life are not here to love you. They are here to remind you that you are the Source of Love.

By knowing that you are the Source of love, you can love yourself, instead of waiting to receive love from the world. Ask yourself, "Why do I need an agent to love myself?" Waiting for the world to love you, is like hiring an agent to love yourself!

By practicing mindfulness and other principles, we become more aware of and present to our fears and others' fears, bearing witness as a way of healing and empowering. We see the spiritual path as intertwined with the path of social action, with contemplation and action parts of the same whole, each nourishing and guiding the other. Acknowledging that our well-being depends on others makes caring for others' well-being a moral responsibility.

Through a "mindful citizen" exercise, we create a story articulating who we are as individuals who are also part of communities. This exercise helps us move beyond cynicism, complacency, and despair, instead infusing us with a sense of purpose. We embrace our gifts, resolving to do our part to promote a sense of common humanity as a means toward social justice.

With this exercise, I believe we can help students bridge their divides and replace anger and distrust with compassionate connections – just as I witnessed between Shirley and Tiffany.

Shirley returned to class after a brief hiatus, keeping a cool distance from Tiffany. But over the weeks spent together they gradually came to know each other. They practiced seeing and listening, sharing stories so different that they felt bewildered as to how they could overcome the gap. But they found that acknowledging their differences led them to discover a place of deep connection in commonalities, such as being raised by grandmothers, and even wounds, including childhood trauma, that they never imagined existed.

In assessments of these classes, students say that these small groups become "healing communities," where we overcome victimization and claim agency. Healing occurs as we transcend an "us vs. them" mentality, crossing borders and forging connections. These communities show a way of reducing intergroup prejudice and fostering inclusion based in psychology research and pedagogical practice.

What makes the others' well-being a moral responsibility for us?**Options:**

- 1) By way of our concerned nature.
- 2) As our own well-being depends on others well-being.
- 3) It depends on one's upbringing.
- 4) It is mentioned as a fundamental duty in our Indian Constitution.

QID : 224 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

He wasn't the first, nor would he be the last, but the wiry, bespectacled man from Gujarat is certainly the most famous of the world's peaceful political dissidents.

Mohandas Gandhi – also affectionately known as Mahatma – led India's independence movement in the 1930s and 40s by speaking softly without carrying much of a big stick, facing down the British colonialists with stirring speeches and non-violent protest. More than anything else, historians say, Gandhi proved that one man has the power to take on an empire, using both ethics and intelligence.

Urges Britain to quit India

It is hard to imagine the thin, robed Gandhi working in the rough and tumble world of law, but Gandhi did get his start in politics as a lawyer in South Africa, where he supported the local Indian community's struggle for civil rights. Returning to India in 1915, he carried over his desire to improve the situation of the lower classes.

Gandhi quickly became a leader within the Indian National Congress, a growing political party supporting independence, and traveled widely with the party to learn about the local struggles of various Indian communities.

It was during those travels that his legend grew among the Indian people, historians say.

Gandhi was known as much for his wit and intelligence as for his piety. When he was arrested several more times over the years for his actions during the movement, Gandhi calmly fasted in prison, believing that his death would embarrass the British enough to spur independence, which had become the focus of his politics by 1920.

Gandhi's non-cooperation movement, kicked off in the early 1920s, called for Indians to boycott British goods and traditions and become self-reliant. His most famous protest came in 1930, when Gandhi led thousands of Indians on a 250-mile march to a coastal town to produce salt, on which the British had a monopoly.

India's title triumph in the Under-19 cricket World Cup at the Bay Oval in New Zealand seemed inevitable. Prithvi Shaw's boys, astutely coached by Rahul Dravid, maintained an unbeaten record through their three-week sojourn. The rousing campaign commenced with a 100-run win against Australia on January 14; in subsequent games, Papua New Guinea, Zimbabwe, Bangladesh and Pakistan were all emphatically defeated. There were no big-game nerves and even in the much-hyped semifinal against Pakistan, India pocketed a facile 203-run victory. In the summit clash against Australia, Shaw's boys followed their template of dominance. Australia was bowled out for 216 and India cruised home in 38.5 overs with eight wickets to spare, and enjoyed the added lustre of opener Manjot Kalra's unbeaten 101. Through the tournament India found diverse heroes. Fittingly, its batting troika of Shaw, Kalra and Shubman Gill, along with seamer Kamlesh Nagarkoti and spinner Anukul Roy, found a berth in the International Cricket Council's Under-19 World Cup team, essentially a tribute to the best players on view in the championship. Cricketing excellence allied with the resultant celebrity status, especially during the teenage years, can be a double-edged sword and it helped that in the dressing room there was the calming presence of Dravid. As the ecstatic players leapt and photo-bombed after clinching the trophy, Dravid cut through the hype and said that this win should not be the team's defining memory as each individual cricketer has much more to achieve in his career. Dravid has a point. India has won the Under-19 World Cup on four occasions, including the previous golden runs in 2000, 2008 and 2012. From among these champion sides, only a few graduated to the big stage. Yuvraj Singh and Virat Kohli came through the under-19 ranks and managed to carve a niche for themselves, but Unmukt Chand, who led the team to the Cup in 2012, and then featured in a soft drink advertisement besides writing a book, has been unable to make it to the Indian senior team.

Through the tournament India found diverse heroes. Fittingly, its batting troika of Shaw, Kalra and Shubman Gill, along with seamer Kamlesh Nagarkoti and spinner Anukul Roy, found a berth in the International Cricket Council's Under-19 World Cup team, essentially a tribute to the best players on view in the championship. Cricketing excellence allied with the resultant celebrity status, especially during the teenage years, can be a double-edged sword and it helped that in the dressing room there was the calming presence of Dravid. As the ecstatic players leapt and photo-bombed after clinching the trophy, Dravid cut through the hype and said that this win should not be the team's defining memory as each individual cricketer has much more to achieve in his career. Dravid has a point. India has won the Under-19 World Cup on four occasions, including the previous golden runs in 2000, 2008 and 2012. From among these champion sides, only a few graduated to the big stage. Yuvraj Singh and Virat Kohli came through the under-19 ranks and managed to carve a niche for themselves, but Unmukt Chand, who led the team to the Cup in 2012, and then featured in a soft drink advertisement besides writing a book, has been unable to make it to the Indian senior team.

What does Rahul Dravid mean by saying that U-19 Cricket World Cup victory of India should not be the "team's defining memory"?**Options:**

- 1) He meant to say that it is just a start of career of each cricketer in the team and they should focus one achieving more.
- 2) He wants them to rest as the tournament was very stressful for them.
- 3) He wants Indian children to pay more focus on cricket as their career choice.
- 4) None of these

India's title triumph in the Under-19 cricket World Cup at the Bay Oval in New Zealand seemed inevitable. Prithvi Shaw's boys, astutely coached by Rahul Dravid, maintained an unbeaten record through their three-week sojourn. The rousing campaign commenced with a 100-run win against Australia on January 14; in subsequent games, Papua New Guinea, Zimbabwe, Bangladesh and Pakistan were all emphatically defeated. There were no big-game nerves and even in the much-hyped semifinal against Pakistan, India pocketed a facile 203-run victory. In the summit clash against Australia, Shaw's boys followed their template of dominance. Australia was bowled out for 216 and India cruised home in 38.5 overs with eight wickets to spare, and enjoyed the added lustre of opener Manjot Kalra's unbeaten 101. Through the tournament India found diverse heroes. Fittingly, its batting troika of Shaw, Kalra and Shubman Gill, along with seamer Kamlesh Nagarkoti and spinner Anukul Roy, found a berth in the International Cricket Council's Under-19 World Cup team, essentially a tribute to the best players on view in the championship. I don't know whether the Madras Photographic Society has anything to do with the recently-publicised Chennai Photo Biennales, the first last year and the next scheduled for 2018, but participant or not, it certainly deserves a bow for being the country's first photographic society. Its founder was an Army doctor, Alexander Hunter. The Society was founded in 1857, shortly after Lord Canning arrived as Governor-General. Canning and Lady Canning, both photography enthusiasts, were responsible for creating the famed Government series, The People of India. Hunter had still earlier, in 1850, privately started the Madras School of Arts. The School, taken over by Government in 1852, moved from Popham's Broadway to Poonamallee High Road. There, he and an eight-member committee revised the syllabus, offering two streams, Industrial and Artistic. Hunter was put in charge of the institution, renamed the Government School of Industrial Arts, in 1855. It was the first formal school of Art in the country. In it, Hunter introduced Photography.

Hunter retired in 1868, to be succeeded by Robert Chisholm. No mean photographer, Hunter encouraged the School, it is now the Government College of Arts and Crafts to build up a photographic collection. Unfortunately, little is left of his work, especially the monuments of South India captured by Government photographer Linnaeus Tripe and his assistant C Iyahsawmi. Hunter himself did a series of pictures of the 'Seven Pagodas' (Mahabalipuram) and worked with his wards on photographs of the five hill tribes of the Nilgiris. It was at a prize-giving of the School that Hunter urged the Governor to provide it more suitable premises. They came up on the PH Road site in Chisholm's time and to his design — and remain there.

It is a labour of love and the result of painstaking research. Chikankari - A Lucknowi Tradition by Paola Manfredi, an Italian, is a book that shows her close and long association with the craft. Lucknow's chikankari is known across the world yet very little research or documentation has been done. Articles or features have appeared off and on but this book is amongst the first of its kind, which aims to document the vast treasure called Chikan. What makes the book extremely interesting is that unlike other books that tend to rely on second hand material, with exhaustive references and quotes, Paola Manfredi has filled her tome with passionate grass-roots level research. The narrative more in the nature of a personal journey, with all the quirks and street-smart practicality, makes the book refreshing. As Paola says in the book, it is not a scholarly or academic research but more of a documentation of the world of chikankari.

Paola questions the use of chikan as a word for embroidery, highlighting that it has a broader connotation encompassing haute couture, the fine art of making a garment, embroidering it and finishing it with finesse. She is no stranger to chikankari having worked with SEWA and several craftsmen. Her love for white on white embroidery also found a calling in chikan. Paola came to India to work in textile exports and as she says, "If you like textiles ... India is a heaven, an inexhaustible treasure trove."

- 2) Staying healthy by myself has been done by regular eating of sprouts.
- 3) To stay healthy sprouts are eaten by me regularly.
- 4) I myself have eaten regularly sprouts to stay healthy.

Correct Answer: To stay healthy sprouts are eaten by me regularly.**Candidate Answer:** To stay healthy sprouts are eaten by me regularly.

QID : 299 - In the following question, a sentence has been given in Active/Passive voice. Out of the four alternatives suggested, select the one which best expresses the same sentence in Passive/Active voice.

She laughed at the antics of the jester.**Options:**

- 1) Laughing at the antics of the jester was done by her.
- 2) She herself laughs at the antics of the jester.
- 3) The antics of the jester were laughed at by her.
- 4) Her laughter was to the antics of the jester.

Correct Answer: The antics of the jester were laughed at by her.**Candidate Answer:** The antics of the jester were laughed at by her.

QID : 300 - In the following question, a sentence has been given in Active/Passive voice. Out of the four alternatives suggested, select the one which best expresses the same sentence in Passive/Active voice.

The boxer lands an upper cut to the chin of his opponent.**Options:**

- 1) Landing of an upper cut was done by the boxer to the chin of his opponent.
- 2) The chin of the opponent is where the upper cut of the boxer has landed.
- 3) Upper cutting of the chin of his opponent has been done by the boxer.
- 4) An upper cut was landed to the chin of his opponent by the boxer.

Correct Answer: An upper cut was landed to the chin of his opponent by the boxer.**Candidate Answer:** An upper cut was landed to the chin of his opponent by the boxer.

QID : 9 - x, y and z are prime numbers and $x + y + z = 38$. What is the maximum value of x?

x, y तथा z अभाज्य संख्याएँ हैं तथा $x + y + z = 38$ है। x का अधिकतम मान क्या है?

Options:

- 1) 19
- 2) 23
- 3) 31
- 4) 29

Correct Answer: 31

Candidate Answer: 31

QID : 10 - N is the smallest three digit prime number. When N is divided by 13, then what will be the remainder?

N तीन अंकों की सबसे छोटी अभाज्य संख्या है। जब N को 13 से विभाजित किया जाता है, तो शेषफल क्या होगा?

Options:

- 1) 8

- 3) 12344
- 4) 123454

Correct Answer: 12344

Candidate Answer: 123456

QID : 13 - $p^3 + q^3 + r^3 - 3pqr = 4$. If $a = q + r$, $b = r + p$ and $c = p + q$, then what is the value of $a^3 + b^3 + c^3 - 3abc$?

$p^3 + q^3 + r^3 - 3pqr = 4$ है। यदि $a = q + r$, $b = r + p$ तथा $c = p + q$ हैं, तो $a^3 + b^3 + c^3 - 3abc$ का मान क्या है?

Options:

- 1) 4
- 2) 8
- 3) 2
- 4) 12

Correct Answer: 8

Candidate Answer: 8

QID : 14 - If α and β are the roots of the equation $x^2 + x - 1 = 0$, then what is the equation whose roots are α^5 and β^5 ?

यदि α तथा β समीकरण $x^2 + x - 1 = 0$ के मूल हैं, तो वह समीकरण क्या है जिसके मूल α^5 तथा β^5 हैं?

Options:

- 1) $x^2 + 7x - 1 = 0$
- 2) $x^2 - 7x - 1 = 0$
- 3) $x^2 - 11x - 1 = 0$
- 4) $x^2 + 11x - 1 = 0$

QID : 18 - If $a - (1/a) = b$, $b - (1/b) = c$ and $c - (1/c) = a$, then what is the value of $(1/ab) + (1/bc) + (1/ca)$?

यदि $a - (1/a) = b$, $b - (1/b) = c$ तथा $c - (1/c) = a$ हैं, तो $(1/ab) + (1/bc) + (1/ca)$ का मान क्या है?

Options:

- 1) -3
- 2) -6
- 3) -1
- 4) -9

Correct Answer: -3

Candidate Answer: -9

QID : 19 - If the roots of the equation $a(b - c)x^2 + b(c - a)x + c(a - b) = 0$ are equal, then which of the following is true?

यदि समीकरण $a(b - c)x^2 + b(c - a)x + c(a - b) = 0$ के मूल बराबर हैं, तो निम्नलिखित में से कौन सा सही है?

Options:

- 1) $b = (a + c)/ac$
- 2) $2/b = (1/a) + (1/c)$
- 3) $2b = (1/a) + (1/c)$
- 4) $abc = ab + bc + ca$

Correct Answer: $2/b = (1/a) + (1/c)$

Candidate Answer: $2b = (1/a) + (1/c)$

QID : 20 - If $[\sqrt{(a^2 + b^2 + ab)}] + [\sqrt{(a^2 + b^2 - ab)}] = 1$, then what is the value of $(1 - a^2)(1 - b^2)$?

यदि $[\sqrt{(a^2 + b^2 + ab)}] + [\sqrt{(a^2 + b^2 - ab)}] = 1$ हो, तो $(1 - a^2)(1 - b^2)$ का मान क्या है?

Options:

- 1) 1/4
- 2) 4/7
- 3) 5/4
- 4) 3/4

Correct Answer: 3/4

Candidate Answer: [NOT ANSWERED]

QID : 21 - If $3x + 4y - 11 = 18$ and $8x - 6y + 12 = 6$, then what is the value of $5x - 3y - 9$?

यदि $3x + 4y - 11 = 18$ तथा $8x - 6y + 12 = 6$ हैं, तो $5x - 3y - 9$ का मान क्या है?

Options:

- 1) 18
- 2) -9
- 3) -27
- 4) -18

Correct Answer: -9

Candidate Answer: -9

QID : 22 - If $a + b + c = 7/12$, $3a - 4b + 5c = 3/4$ and $7a - 11b - 13c = -7/12$, then what is the value of $a + c$?

यदि $a + b + c = 7/12$, $3a - 4b + 5c = 3/4$ तथा $7a - 11b - 13c = -7/12$ हैं, तो $a + c$ का मान क्या है?

एक शंकु की ऊँचाई 45 से.मी. है। इसे आधार से 15 से.मी. ऊपर एक तल द्वारा उसके आधार के समानांतर काटा जाता है। यदि छोटे शंकु का आयतन 18480 से.मी.^3 है, तो मूल शंकु का आयतन (से.मी. 3 में) क्या है?

- Options:**
 1) 34650
 2) 61600
 3) 36960
 4) 62370

Correct Answer: 62370

Candidate Answer: 62370

QID : 42 - The ratio of the curved surface area and total surface area of a right circular cylinder is $2 : 5$. If the total surface area is 3080 cm^2 , then what is the volume (in cm^3) of the cylinder?

एक लम्बवत वृत्ताकार बेलन के वक्र पृष्ठीय क्षेत्रफल तथा कुल पृष्ठीय क्षेत्रफल का अनुपात $2 : 5$ है। यदि कुल पृष्ठीय क्षेत्रफल 3080 से.मी.^2 है, तो बेलन का आयतन (से.मी. 3 में) क्या है?

- Options:**
 1) $4312\sqrt{6}$
 2) $3822\sqrt{6}$
 3) $4522\sqrt{6}$
 4) $4642\sqrt{6}$

Correct Answer: $4312\sqrt{6}$

Candidate Answer: $4522\sqrt{6}$

QID : 43 - The radius and height of a solid cylinder are increased by 2% each. What will be the approximate percentage increase in volume?

एक ठोस बेलन की त्रिज्या तथा ऊँचाई प्रत्येक को 2% से बढ़ाया जाता है। आयतन में लगभग कितने प्रतिशत की वृद्धि होगी?

- Options:**
 1) 6.76
 2) 5.88
 3) 6.12
 4) 3.34

Correct Answer: 6.12

Candidate Answer: 6.76

QID : 44 - A sphere of radius 21 cm is cut into 8 identical parts by 3 cuts (1 cut along each axis). What will be the total surface area (in cm^2) of each part?

एक 21 से.मी. त्रिज्या वाले गोले को 3 कटाव (प्रत्येक अक्ष पर 1 कटाव) लगाकर 8 समरूप भागों में काटा जाता है। प्रत्येक भाग का कुल पृष्ठीय क्षेत्रफल (से.मी. 2 में) क्या होगा?

- Options:**
 1) 844.5
 2) 1732.5
 3) 1039.5
 4) 1115.6

Correct Answer: 1732.5

Candidate Answer: 1732.5

QID : 45 - Two identical hemispheres of maximum possible size are cut from a solid cube of side 14 cm. The bases of the hemispheres are part of the two opposite faces of cube. What is the total volume (in cm^3) of the remaining part of the cube?

दो समरूप अधिकतम संभव माप वाले अर्धगोलों को एक 14 से.मी. भुजा वाले ठोस घन से काटा जाता है। अर्धगोलों के आधार घन के दो विपरीत फलक के भाग हैं। घन के शेष भाग का कुल आयतन (से.मी. 3 में) क्या है?

- Options:**
 1) 1556.33
 2) 898.5
 3) 1467.33
 4) 1306.67

Correct Answer: 1306.67

Candidate Answer: 1306.67

QID : 46 - Identical cubes of largest possible size are cut from a solid cuboid of size $65 \text{ cm} \times 26 \text{ cm} \times 3.9 \text{ cm}$. What is the total surface area (in cm^2) of all the small cubes taken together?

एक ठोस घनाभ जिसका माप $65 \text{ से.मी.} \times 26 \text{ से.मी.} \times 3.9 \text{ से.मी.}$ है, से अधिकतम संभव माप वाले समरूप घनों को काटा गया। सभी छोटे घनों का मिलाकर कुल पृष्ठीय क्षेत्रफल (से.मी. 2 में) क्या है?

Transactional Analysis has the triangle of PAC. P means parent, A means adult, C means child. These are your three layers, as if you are a three-storeyed building. The first floor is that of the child, the second floor is that of the parent, the third floor is that of the adult. All three exist together. This is your inner triangle and conflict. Your child says one thing, your parent says something else, and your adult, rational mind says something else. The child says 'enjoy'. For the child, this moment is the only moment; he has no other considerations. The child is spontaneous, but unaware of the consequences — unaware of past, unaware of future. He lives in the moment. He enjoys — but his enjoyment is not creative, cannot be creative. He delights — but life cannot be lived only through delight.

You cannot remain a child forever. You will have to learn many things because you are **not alone** here....The child has to be disciplined — and that's where the parent comes in. The parental voice in you is the voice of the society, culture, civilization; the voice that makes you capable of living in a world where you are not alone —where there are many individuals with conflicting ambitions, where there is much struggle for survival, where there is much conflict. The parental voice is that of caution. It makes you civilized. The word 'civil' is good. It means one who has become capable of living in a city, who has become capable of being a member of a group, of a society. It is needed. And then there is the third voice within you, the **third layer**, when you have become adult and you are no longer controlled by your parents; your own reason has come of age, you can think on your own. And these **three layers** are continuously fighting. The child says one thing, the parent says just the opposite, and the reason may say something totally different. There is no **necessity** that your adult mind agrees with your parents.

Many times you find them very dogmatic, superstitious, believing in foolish things, irrational ideologies. Your parent says do it, your adult says it is not worth doing, and your child goes on pulling you somewhere else. This is the triangle within you.

The Indian Space Research Organisation boosted its reputation further when it successfully launched a record 104 satellites in one mission from Sriharikota on 15th February, 2017 by relying on its workhorse PSLV rocket. An earth observation Cartosat-2 series satellite and two other nano satellites were the only Indian satellites launched; the remaining were from the United States, Israel, the UAE, the Netherlands, Kazakhstan and Switzerland. Of the 101 foreign satellites launched, 96 were from the U.S. and one each from the other five countries. Till now Russia held the record of launching 37 satellites in a single mission, in 2014, while the National Aeronautics and Space Administration of the U.S. launched 29 satellites in one go in 2013. Last June, ISRO had come close to NASA's record by launching 20 satellites in one mission. But ISRO views the launch not as a mission to set a world record but as an opportunity to make full use of the capacity of the launch vehicle. The launch is particularly significant as ISRO now cements its position as a key player in the lucrative commercial space launch market by providing a cheaper yet highly reliable alternative. At an orbital altitude of around 500 km, the vehicle takes about 90 minutes to complete one orbit. Though ISRO had sufficient time to put the satellites into orbit, it accomplished the task in about 12 minutes. With the focus on ensuring that no two satellites collided with each other, the satellites were injected in pairs in opposite directions. Successive pairs of satellites were launched once the vehicle rotated by a few degrees, thereby changing the separation angle and time of separation to prevent any collision.

Besides setting the record for the most number of satellites launched in a single mission, the Indian space agency has launched two nano satellites weighing less than 10 kg. It is a technology demonstrator for a new class of satellites called ISRO nano satellites (INS). With many Indian universities already building and launching nano satellites, the availability of a dedicated nano satellites platform is sure to boost space research in India.

At an orbital altitude of around 500 km, the vehicle takes about 90 minutes to complete one orbit. Though ISRO had sufficient time to put the satellites into orbit, it accomplished the task in about 12 minutes. With the focus on ensuring that no two satellites collided with each other, the satellites were injected in pairs in opposite directions. Successive pairs of satellites were launched once the vehicle rotated by a few degrees, thereby changing the separation angle and time of separation to prevent any collision.

Besides setting the record for the most number of satellites launched in a single mission, the Indian space agency has launched two nano satellites weighing less than 10 kg. It is a technology demonstrator for a new class of satellites called ISRO nano satellites (INS). With many Indian universities already building and launching nano satellites, the availability of a dedicated nano satellites platform is sure to boost space research in India.

In how many minutes the ISRO put the satellite into orbit which was launched by it recently?

Options:

- 1) 90 minutes
- 2) 37 minutes
- 3) 20 minutes
- 4) 12 minutes

Correct Answer: 12 minutes

Candidate Answer: 12 minutes

QID : 222 - A passage is given with five questions following it. Read the passage carefully and select the best answer to each question out of the given four alternatives.

The Indian Space Research Organisation boosted its reputation further when it successfully launched a record 104 satellites in one mission from Sriharikota on 15th February, 2017 by relying on its workhorse PSLV rocket. An earth observation Cartosat-2 series satellite and two other nano satellites were the only Indian satellites launched; the remaining were from the United States, Israel, the UAE, the Netherlands, Kazakhstan and Switzerland. Of the 101 foreign satellites launched, 96 were from the U.S. and one each from the other five countries. Till now Russia held the record of launching 37 satellites in a single mission, in 2014, while the National Aeronautics and Space Administration of the U.S. launched 29 satellites in one go in 2013. Last June, ISRO had come close to NASA's record by launching 20 satellites in one mission. But ISRO views the launch not as a mission to set a world record but as an opportunity to make full use of the capacity of the launch vehicle. The launch is particularly significant as ISRO now cements its position as a key player in the lucrative commercial space launch market by providing a cheaper yet highly reliable alternative. Let's move to the crackling topic of the SC's firecracker ban in Delhi. Like me and millions of other children raised in India, Masaba must have celebrated Diwali with new clothes, sweets and the quintessential rockets, anars and phuljhari. But when she supports the ban on firecrackers because of the pollution it creates, the earthworms once again flail desperately, not by quoting statistics or making logical arguments to refute her point but by muck-raking. 'Don't mess with our ancient traditions,' they say. I would like to tell them that if we stuck to all our traditions just because they're ancient then we should still be pushing widows into funeral pyres to commit sati and get our children married off at the age of eight.

As much as I would like to see the delight on my daughter's face — the same glee I had as a child — while bursting atom bombs and laris, it is the present scenario and not nostalgia that must dictate my actions. If even doctors welcome the ban as they feel fumes from firecrackers take pollution levels beyond safe limits, then perhaps we need to change our traditional values and create new ones. If saying that makes me a bad Indian, then so be it.

One of the greatest privileges I have — in fact because of the very background that they are trying to smear — stems from the fact that I was lucky enough to have a mother who has raised me to believe that equality isn't one of my privileges but it is my right. One that was hard won by some brave and fearless women, women who set the right precedent for other women by standing against inequality.

The flailing trollers do not realize that you cannot shame us by pulling down our mothers, those fiercely independent women who have lived life on their own terms, who have not just talked the talk but walked the walk. Yes, you can reason with us by presenting a logical argument but this seems to be beyond the resources of these anonymous creatures hiding their faces in the mud.

And yes one last thing, for all those claiming to be the flag-bearers of ancient traditions, it would be lovely if you adhered to your so-called traditional ways completely. Why do you write open letters, tweet and troll in the language of the Brits? Why not go traditional there as well, use only our ancient languages and spare us your venom-filled and grammatically incorrect English?

The first thing is that the rich people of the world should start living in communes. Let those communes be of the rich! So they will not be dragged down from their standard of life, their comforts, and their luxuries. Let there be, around the world, hundreds of communes of rich people — that is, rich communes.

And to me, wealth is a certain kind of creativity. If five thousand rich people who have all created wealth individually are together, they can create wealth a million-fold. Their standard will not go lower; their standard could go even higher. Or they can start sharing. They can start inviting people who are not rich but who are creative in some other way, who will enhance the life of their commune although they may be poor.

Five thousand rich people, together with their genius for creating wealth, are capable of creating so much wealth that they can invite thousands of other people who may not be rich in the sense of being wealthy, but who may be rich as painters, poets, dancers, singers.

What are you going to do only with wealth? You cannot play music on money; you cannot dance just because you have so much cash in the bank. And these rich communes can start becoming bigger, absorbing more and more creative people. They can make beautiful places all around the world, and slowly, new people can be absorbed.

For example, you will need plumbers, however rich you may be; you will need mechanics; technicians; you will need shoemakers. Invite them — and they come to you not as servants, but as members of the commune. Slowly, we can transform the whole world — without any bloodshed and without any dictatorship.

A communism that comes out of love, out of intelligence, out of generosity, will be real. A communism that comes through force is going to be unreal. There is not a single man in the world, howsoever poor, who has nothing to contribute. Around the world all the rich communes will need people; and slowly, slowly your commune will become bigger and bigger.

The rich will not become poor, but the poor will become rich, and respectable, and equal — in no way inferior to anybody else — because they are also functioning in the same way as anybody else. And whatever they are doing is needed as much as anybody else's expertise is needed.

According to the passage, what is an advantage of rich people living in communes?

Options:

- 1) So that communes belong to the rich and their standard of living gets uplifted.
- 2) So that all of them can club their creativity together.
- 3) Because rich people need plumbers, mechanics, shoemaker and technicians too.
- 4) Because you cannot dance just because you have cash in the bank.

Correct Answer: So that communes belong to the rich and their standard of living gets uplifted.

QID : 249 - Read the passage carefully and choose the best answer to each question out of the four alternatives.

There may be some merit in this, but clearly, we need to look at the hawkers issue more broadly. For quite some time now, many middle-class citizens groups have urged strict action against hawkers, asking residents not to favour their business. The terms routinely used to refer to hawkers and vendors is "menace", with their everyday businesses described as "encroachments" on public space. This, despite the fact that an existing 2014 central law, the Street Vendors (Protection of Livelihood and Regulation of Street Vending) Act, protects their presence as a part of the right to livelihood. The law specifies the number of licensed hawkers permitted and outlines the process to implement a fair street vending policy. Mumbai and other cities have failed to implement the law to date, with the Mumbai municipality having frozen hawker licenses since 1978. As a result, only a fraction of Mumbai's hawkers are licensed. Hawkers desire legal status — their illegality makes them vulnerable to extortion and harassment by a whole range of State and non-State actors.

Unfortunately, by looking upon the hawkers question as only a clearing of pavements issue, we have neglected to see their contribution in several other ways. Firstly, hawkers are not the only ones sullying our pavements. But they are far easier to target as villains than the middle-class who use pavements for car parking and shops/restaurants who unabashedly extend their shopfronts onto footpaths. Secondly, hawking is also an employment issue. It provides the urban poor a means to earn a legitimate livelihood, and in fact, many sell goods produced in small-scale or home-based industries.

Why does the middle class think of hawking as a menace?

Options:

- 1) They think hawking is illegal activity
- 2) They think hawkers take away business from their shops
- 3) They think once hawkers get licenses it will be difficult to evict them
- 4) They think hawking crowds them out of public space

Correct Answer: They think hawking crowds them out of public space

Candidate Answer: They think hawkers take away business from their shops

Vibrant salads, wholesome bites, vegan baking, all vegetarian!" Thus proclaimed a billboard on a stand placed just outside The Lighthouse Cafe. Well, well, well, I thought to myself, another one of those places designed to attract tourists; can't be genuine, can it? I couldn't have been more wrong. I'd embarked on a walking tour of Galway, a city facing the Atlantic, in the Republic of Ireland, and my guide was Billy Murray who told me at the outset that I would be the solitary walker – others had stayed away because of the dismal weather. The weather had indeed been unfriendly, with beating rain, thunder, poor visibility and of course, gray and cold, especially on the Wild Atlantic Way where I had braved the weather and carried on with a coach tour I'd booked earlier, after having spent the previous day driving down to Galway from Dublin. But today the rains had stopped and the sky was clear but still gray and yet, I found the ambience rather romantic and full of promise. "Of course, we'll go on that walking tour," I said to a surprised Billy who led me out of the Tourist Centre in downtown Galway and on to the rain-washed street. At the end of the rather comprehensive tour I asked Billy for advice – where should I eat my lunch? And he'd recommended the Lighthouse Cafe near Lynch's Castle (now a bank) when I specified that I was vegetarian.

It seems there are quite a few local residents who are vegetarian and more are exploring this choice, mainly because of health and environmental reasons. But the decor inside the restaurant suggested that the owner turned to this choice due to compassion. I remembered then that Billy did mention that Kerry Legh and her spouse, who run the place, practise Sahaj Marga meditation. The lotus flower was a dominant feature of the restaurant's interior. Be that as it may, my lunch turned out to be one of the best vegetarian ones I've ever had anywhere in the world. When I'd entered the restaurant, a large dog that answers to the name of 'Chieftain' was seated beside his owner, intently watching him eat, without begging even once. Maybe they too practise some kind of meditation, I figured.

Why was the author considered as solitary walker in Galway by the guide Billy Murray?

Options:

- 1) Because of the bad weather that day.
- 2) Because the author hardly use to mingle up with the people around.
- 3) As the author was left behind by her friend who accompanied her to this tour.
- 4) The author always preferred to travel all alone.

The Russian doping scandal continues to cast a long shadow over international sport as the 2018 Winter Olympics begin in Pyeong Chang, South Korea, on February 9. In December, the International Olympic Committee banned Russia from competing in the Games following investigation into an alleged state-sponsored doping programme at the 2014 Winter Olympics in Sochi, Russia. The decision to ban Russia came after the IOC's Disciplinary Commission, headed by former president of the Swiss Confederation Samuel Schmid, confirmed "systemic manipulation of the anti-doping rules and system in Russia". The IOC had stated, however, that clean Russian athletes would be allowed to compete as neutrals and last month invited 169 of them – each to be known as Olympic Athlete from Russia (OAR) – to participate in the Pyeong Chang Games. The announcement did not go down well outside Russia, even though the IOC declared that "more than 80%" of those athletes had not competed in Sochi and had been carefully vetted. That the OAR will form one of the largest contingents at the Games, although there will be no place for the Russian flag and anthem, makes the 'ban' seem a bit of a farce. Further, Russian athletes could be allowed to march under their own flag at the closing ceremony if they comply with the IOC's conditions during the Games. There is a sense that the IOC is not able to punish a sporting superpower like Russia.

The decision to ban Russia came after the IOC's Disciplinary Commission, headed by former president of the Swiss Confederation Samuel Schmid, confirmed "systemic manipulation of the anti-doping rules and system in Russia". The IOC had stated, however, that clean Russian athletes would be allowed to compete as neutrals and last month invited 169 of them – each to be known as Olympic Athlete from Russia (OAR) – to participate in the Pyeong Chang Games. The announcement did not go down well outside Russia, even though the IOC declared that "more than 80%" of those athletes had not competed in Sochi and had been carefully vetted. That the OAR will form one of the largest contingents at the Games, although there will be no place for the Russian flag and anthem, makes the 'ban' seem a bit of a farce. Further, Russian athletes could be allowed to march under their own flag at the closing ceremony if they comply with the IOC's conditions during the Games. There is a sense that the IOC is not able to punish a sporting superpower like Russia.

Why does ban on Russian flag and anthem during Winter Olympic Games 2018 seem a bit of a farce?**Options:**

- 1) Because Russian Athletes will be one of the largest team to compete in the games.
- 2) The games are organized in Russia only.
- 3) Russia has always played these games legally and ethically.
- 4) Russian players are best in the world when comes to playing in Olympics.

Correct Answer: Because Russian Athletes will be one of the largest team to compete in the games.**Candidate Answer:** Russian players are best in the world when comes to playing in Olympics.**QID : 322** - Read the passage carefully and select the best answer to each question out of the given four alternatives.

The Russian doping scandal continues to cast a long shadow over international sport as the 2018 Winter Olympics begin in Pyeong Chang, South Korea, on February 9. In December, the International Olympic Committee banned Russia from competing in the Games following investigation into an alleged state-sponsored doping programme at the 2014 Winter Olympics in Sochi, Russia. The decision to ban Russia came after the IOC's Disciplinary Commission, headed by former president of the Swiss Confederation Samuel Schmid, confirmed "systemic manipulation of the anti-doping rules and system in Russia". When did the decision come to ban Russia in Winter Olympic Games 2018?

Options:

- 1) It was after IOC's head confirmed systematic manipulation of the anti doping rules and system in Russia in Winter Olympics Games 2014.
- 2) It was after examining Russia athletics who didn't qualify the rules for the games to play.
- 3) It was after the Russia which argued special treatment to be given to its players during the games.
- 4) It was when Russia complained of bad weather of South Korea where the games have begun.

Correct Answer: It was after IOC's head confirmed systematic manipulation of the anti doping rules and system in Russia in Winter Olympics Games 2014.

Religious architecture forms a major portion of India's built heritage. These structures are not only unwritten documents of history, they are also stamps of the might of the rulers who built them and articulations of grand visions.

Secular and religious structures are products of their location – the material used to build them depended on what was available to the kings and workers at that time. They were also a reflection of the piety of the artisans and workers, for nothing else can explain the hard work that went into cutting through solid natural rock to carve out temples and spectacular sculptures. Rock-cut architecture never fails to awe me with all its majesty, precision, and intricate detail.

The earliest rock-cut architecture is from the Mauryan dynasty, but the Ajanta caves, which I had visited a few decades ago and which left me awestruck, are among the earliest rock-cut temples.

The Udayagiri caves, in Vidisha, Madhya Pradesh, are not as popular but they are worth a visit, for they contain some of the oldest Hindu temples and iconography. They were built during the Gupta period (350-550 CE).

These caves were not just an expression of religious piety but also a political statement. They lie on two low sandstone hills between the rivers Betwa and Beas. It is possible that when these caves were carved out, they fell directly on the Tropic of Cancer and thus the name translates to Mount of Sunrise. On the day of summer solstice, the sun would have been directly overhead, making this a place of worship.

From what all materials the kings in the past used to build beautiful architectures?

Options:

- 1) The material that was available to the kings and workers at that time.
- 2) Special kind of raw material was asked to be produced by the people by the king to build these architectures.
- 3) Most of the material was imported from outside India by the kings.
- 4) None of these

Correct Answer: The material that was available to the kings and workers at that time.

Malnutrition affects millions of people worldwide and is responsible for one-fifth of deaths in children under the age of five. Children can also experience impaired cognitive development and stunted growth.

According to Finlay and UBC PhD student Eric Brown, malnutrition can be difficult to treat because it affects the good bacteria that live in the gut. People suffering from malnutrition often show signs of a disease known as environmental enteropathy, which is an inflammatory disorder of the small intestine and is likely caused by ingesting pathogenic fecal bacteria early in life from a contaminated environment. This shifts the balance of the original healthy bacteria in the gut and leads to poor absorption of nutrients.

The study, published in *Nature Communications*, explains how the research team developed a mouse model to reproduce the symptoms of environmental enteropathy and malnourishment.

"We were able to see how a malnourished diet has a strong, measurable impact on the microbes in the small intestine," said Brown. "This new model gives us the opportunity to examine the impact of malnutrition on gut microbiology and assess the role of infections."

Pathogenic bacterial infections like salmonella and *E. coli* are huge problems in developing countries because they are much more harmful to people suffering from malnutrition, leading to chronic diarrhea and inflammation.

"Treatments and vaccines created in developed nations and tested on healthy people often don't work in malnourished populations," said Finlay, distinguished professor at UBC's Peter Wall Institute for Advanced Studies. "People suffering from malnutrition respond differently."

With an animal model, Finlay said researchers will be better able to test treatments and understand how malnutrition impacts a child's development.

Why malnutrition is difficult to be treated?

Options:

- 1) As it is a communicable disease.
- 2) No vaccine is available for it.
- 3) People don't consider malnutrition a serious problem at all.
- 4) As it affects the good bacteria in the gut.

The elusive and charismatic snow leopard has lost its endangered status in the Red List of the International Union for Conservation of Nature, causing genuine worry among wildlife biologists, who believe this sends out the wrong signal to those working to protect it. If the argument for a downgrade to vulnerable status from endangered is that conservation actions have reduced the threat to the cat, there is an equally persuasive response on how little scientists know about its population health, given its remote habitat in the alpine zones of the Himalayas and trans-Himalayas. As a major range country, India has worked to protect these animals, and even launched a programme on the lines of Project Tiger for its conservation, covering 128,757 sq. km of habitat in Jammu and Kashmir, Himachal Pradesh, Uttarakhand, Sikkim and Arunachal Pradesh. There is also an upcoming international collaborative effort, the Global Snow Leopard and Ecosystem Protection Program, involving the countries that make up the range of this graceful animal. It is vital that this momentum should not be lost merely on account of the technicality that the estimated numbers have crossed the threshold for an 'endangered' classification, which is 2,500. If anything, studies on its vulnerability have to be intensified, and the task of monitoring its entire habitat of high mountains speeded up.

Which countries will be involved in the collaboration to protect the snow leopard?**Options:**

- 1) Member countries of International Union for Conservation of Nature
- 2) Countries which are financing the project to conserve the snow leopard
- 3) Same countries which participated in Project Tiger
- 4) Countries where the snow leopard is found

Correct Answer: Countries where the snow leopard is found**Candidate Answer:** Member countries of International Union for Conservation of Nature**QID : 345** - Read the passage carefully and choose the best answer to each question out of the four alternatives.

The elusive and charismatic snow leopard has lost its endangered status in the Red List of the International Union for Conservation of Nature, causing genuine worry among wildlife biologists, who believe this sends out the wrong signal to those working to protect it. If the argument for a downgrade to vulnerable status from endangered is that conservation actions have reduced the threat to the cat, there is an equally persuasive response on how little scientists know about its population health, given its remote habitat in the alpine zones of the Himalayas and trans-Himalayas. As a major range country, India has worked to protect these animals, and even launched a programme on the lines of Project Tiger for its conservation, covering 128,757 sq. km of habitat in Jammu and Kashmir, Himachal Pradesh, Uttarakhand, Sikkim and Arunachal Pradesh. Why do the scientists find it difficult to study the snow leopard?**Options:**

- 1) Due to governmental restrictions
- 2) Due to its remote habitat
- 3) Due to lack of funding
- 4) Due to its nocturnal habits

Why did the snow leopard lose its 'endangered' status?

Options:

- 1) Due to increase in its habitat area
- 2) Due to disagreement between wildlife experts
- 3) Due to inability in counting its population
- 4) Due to rise in its numbers

Correct Answer: Due to rise in its numbers

Candidate Answer: Due to disagreement between wildlife experts

As the 23rd conference of the UN Framework Convention on Climate Change in Bonn shifts into high gear, developing countries including India are focussing on the imperatives of ensuring adequate financing for mitigation and adaptation. They are moving ahead with specific instruments for loss and damage they suffer due to destructive climate-linked events. India's progress in reducing the intensity of its greenhouse gas emissions per unit of GDP by 20-25% from 2005 levels by 2020, based on the commitment made in Copenhagen in 2009, has been positive. Early studies also suggest that it is on track to achieve the national pledge under the 2015 Paris Agreement for a 33-35% cut in emissions intensity per unit of growth from the same base year (2015) by 2030, and thus heed the 2°C global warming goal. Since this performance is predicated on a growth rate of just over 7%, and the parallel target for 40% share of renewable energy by that year (2030), the national road map is clear. What is not, however, is the impact of extreme weather events such as droughts and floods that would have a bearing on economic growth. It is in this context that the rich countries must give up their rigid approach towards the demands of low and middle income countries, and come to an early resolution on the question of financing of mitigation, adaptation and compensation. Of course, India could further raise its ambition in the use of green technologies and emissions cuts, which would give it the mantle of global climate leadership.

The rich and the poor countries have not yet agreed on which issue?

Options:

- 1) The time frame by which each country should achieve their climate goals
- 2) The amount of acceptable rise in global temperature
- 3) How to fund the costs for mitigation, adaptation and compensation
- 4) The share of renewables in energy generation

Correct Answer: How to fund the costs for mitigation, adaptation and compensation

Candidate Answer: How to fund the costs for mitigation, adaptation and compensation

What is the Paris Agreement's central aim?

Options:

- 1) To keep rise in global temperature below 2°C
- 2) To compel rich countries to give up their rigid approach
- 3) Force developing countries to be more ambitious in their emission cuts
- 4) The world should have atleast 40% energy from renewables

Correct Answer: To keep rise in global temperature below 2°C

Candidate Answer: To keep rise in global temperature below 2°C
