Read the passage given below and answer the questions that follow it by choosing the best option for each:

'The aggressive first person' has taken over our public space. We're having too many mys thrust upon us these days. An example of the aggressive first person is this on the bag in my hand: 'I'm a renewable bag. I'm made with natural fibres so I'm great for the environment and gorgeous.' 'How sweet,' we're meant to think, 'that a hessian bag can talk to us and say such adorable things about itself! I'll definitely start using one of those bags now.' The words are always written in a fake-childish font to add to the cuteness. They make you feel horribly patronised and preached-at. The people in head office have obviously decided that, although they, the intelligent ones, understand all about saving the environment, if it's to get across to thick us, they'll need to put it in baby language. The fact that they think this is gently, lovably humorous also depresses me about the state of our sense of humour.

More and more of what we do doesn't involve any human contact. We're on our own, running our lives at our screens, and we're being lulled into a sense of being loved, cared about and important. But it is a false sense. No one loves us and nothing much is ours. I prefer the more honest second person in YouTube: less invasive. But the me-camp is winning. When the next general recruits his army and navy to fight the world war, the poster luring us to certain death will say 'My Country Needs Me' – not 'Your Country Needs You.'
